Managerial Economics and Organizational Architecture James A. Brickley,Clifford W. Smith,Jerold L. Zimmerman,2004 This approach to managerial economics takes models from recent economic research and applies them to the internal structure of the firm After teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making The general model used for this application is organizational architecture which consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals and the structure of systems to evaluate the

performance of both individuals and business units These three elements must balance in an organization Managerial Economics & Organizational Architecture James A. Brickley, Clifford Smith, Jerold L. Zimmerman, 2007 With two distinct objectives this text's approach to managerial economics takes models from recent economics research and applies the research to the internal structure of a firm After teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making Authors Brickley Smith and Zimmerman contend that organizational architecture consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals the structure of systems to evaluate the performance of both individuals and business units These three components can be likened to a stool with three legs If one of the legs is shorter the stool is out of balance These three elements must be in balance in the organization as well **Managerial Economics** James R.
