The Oxford Handbook of the Incas Sonia Alconini, R. Alan Covey, 2018-04-02 When Spaniards invaded their realm in 1532 the Incas ruled the largest empire of the pre Columbian Americas Just over a century earlier military campaigns began to extend power across a broad swath of the Andean region bringing local societies into new relationships with colonists and officials who represented the Inca state With Cuzco as its capital the Inca empire encompassed a multitude of peoples of diverse geographic origins and cultural traditions dwelling in the outlying provinces and frontier regions Bringing together an international group of well established scholars and emerging researchers this handbook is dedicated to revealing the origins of this empire as well as its evolution and aftermath Chapters break new ground using innovative multidisciplinary research from the areas of archaeology ethnohistory and art history The scope of this handbook is comprehensive It places the century of Inca imperial expansion within a broader historical and archaeological context and then turns from Inca origins to the imperial political economy and institutions that facilitated expansion Provincial and frontier case studies explore the negotiation and implementation of state policies and institutions and their effects on the communities and individuals that made up the bulk of the population Several chapters describe religious power in the Andes as well as the special statuses that staffed the state religion maintained records served royal households and produced fine craft goods to support state activities The Incas did not disappear in 1532 and the volume continues into the Colonial and later periods exploring not only the effects of the Spanish conquest on the lives of the indigenous populations but also the cultural continuities and discontinuities Moving into the present the volume ends with an overview of the ways in which the image of the Inca and the pre Columbian past is memorialized and reinterpreted by

Central America Sophie Brockmann, 2020-09-17 In this ambitious new study Sophie Brockmann argues that interactions with landscape and environment were central to the construction of Central American identities in the Age of Enlightenment She argues that new intellectual connections and novel ways of understanding landscapes had a transformative impact on political culture as patriotic reformers sought to improve the region's fortunes by applying scientific and useful knowledge gathered from local and global networks to the land These reformers established networks that extended into the countryside and far beyond Central America's borders Tracing these networks and following the bureaucrats priests labourers merchants and scholars within them Brockmann shows how they made a lasting impact by defining a new place for the natural world in narratives of nation and progress *Empires of the Dead* Christopher Heaney, 2023 This book explains why Inca mummies and ancient Peruvian skulls filled museums around the world from 1532 to the present and why they tell us more about the colonial violence of science than their more famous Egyptian cousins **Journal of Anthropological Research**, 2015
