The M16 Gordon L. Rottman, 2011-12-20 The M16 was first introduced in 1958 and was revolutionary for its time as it was made of lightweight materials including special aluminum and plastics It was first adopted by US Special Forces and airborne troops in 1962 before it was issued to Army and Marine units serving in Vietnam Its use spread throughout the following decades and a number of variants including submachine and carbine versions were also fielded As a result it is now amongst the three most used combat cartridges in the world while over 10 million M16s and variants have been produced making it one of the most successful American handheld weapons in history But despite its undeniable success the M16 is not without its detractors Indeed the black rifle as it is known is one of the most controversial rifles ever introduced with a long history of design defects ruggedness issues

cleaning difficulties and reliability problems leading to endless technical refinements This volume provides a technical history of the M16 and the struggle to perfect it together with an assessment of its impact on the battlefield drawing on over a decade s combat experience with the rifle FM 23-9 Rifle Marksmanship: M16A1, M16A2/3, M16A4 and M4 Carbine 2003 United States United States Department of the Army,2017-03-29 FM 23 9 Rifle Marksmanship M16A1 M16A2 3 M16A4 and M4 Carbine 2003 This manual provides guidance for planning and executing training on the 5 56 mm M16 series rifle M16A1 A2 A3 A4 and M4 carbine It is a guide for commanders leaders and instructors to develop training programs plans and lessons that meet the objectives or intent of the United States Army rifle marksmanship program and FM 7 0 Training the Force This manual is organized to lead the trainer through the material needed to conduct training during initial entry training IET and unit sustainment training Preliminary subjects include discussion on the weapons capabilities mechanical training and the fundamentals and principles of rifle marksmanship Live fire applications are scheduled after the soldier has demonstrated preliminary skills 116 Pages **Infantry** ,1995 **Fm 3-22.9 Fm 23-9 Rifle Marksmanship M16a1, M16a2-3, M16a4, and M4 Carbine Manual** U.s. empirically derived live fire performance standards needed to support use of LMTS in place of live fire for rifle marksmanship proficiency validation purposes when standard pop up target course range facilities are not readily available Although both tools will serve these purposes that based on LMTS dry fire is recommended because of the added expense of firing with Blazer without an accompanying statistically significant increased predictive benefit *U.s.
