Poor's, 1940 **Joomla! For Dummies** Seamus Bellamy, Steve Holzner, 2011-01-13 Build template based web sites without the hassle of writing code Joomla is a free open source PHP MySQL based content management system that allows you to create interactive community based Web sites without having to write or program code in PHP or ASP.NET This fun and friendly introduction to Joomla shows you how to create a rich interactive Web site that does not require any code No matter your skill level this easy to understand resource demonstrates how to drop preconfigured modules that already contain PHP and MySQL code directly into your Joomla site Thanks to the Dummies fun and friendly approach you'll quickly see how easy to create a rich interactive Web site with Joomla Demonstrates how to create a business site complete with shopping cart quickly and easily Walks you through developing Web sites with discussions RSS feeds picture submissions and more Includes coverage of the newest version of Joomla explains its completely new administrative features and reviews its ability to provide different levels of access to different users via much requested access control lists Find out why Joomla is the easiest way to build an interactive community based Web site *JEmbedAll manual* Dan-Marius Sabau, 2017-01-29 JEmbedAll is a Joomla component and plugin that you can purchase from <http://www.goldengravel.eu> something you can add to your website and start embedding videos images and more other features to your site The role of the component is mainly to configure the data you are embedding using the plugin but it also offers support for downloading files and generating ebooks The package it's easy to configure and to work with Some features have to be configured there is a configuration section just for that in the backend in order to be embedded and used properly in the frontend other features are integrated and you just used them as they are Even so you may set some details right using the CSS attached to the predefined or user defined strings used for embed code on your Joomla site Purchase it and download the package for your Joomla version then install it in order to have a powerful tool to embed videos from YouTube Google Vimeo Metacafe Veoh Dailymotion RedTube and others documents images and Google forms used for quiz You can also embed Facebook pages plugins images and videos Community Builder advanced searches Prezi and Scribd documents Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data with all the data and thumbnails ready for Facebook and all the sites The online manual and the generated ebook based on it are very

detailed about each feature but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo for example and upload your files; the documents can be Portable Document Format (PDFs), Word docs, Power Point, SpreadSheets, and any other documents recognized by Google Docs on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com but that works fine; it works as well if they are on any other website but you have to enter the full path of the file. You can define, configure, and embed any number of jQuery images sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages; they can contain any number of files the visitors can download for free or for money. Paypal payment included. You can define, configure, and embed Community Builder advanced searches; this component works with any CB version. Since JEmbedAll version 1.3 the search results can open in the same window, in a different window, or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy, a tool that restricts access to some fields or even the users on searches. You can embed Facebook pages, posts, videos, and images depending on the Facebook privacy; in many cases, all this has to be public for everyone to see, but you can also embed some plugins: Facebook activity, comments, facepile, likebox, and recommendations. Starting with the 1.5 version, you can generate and download e-books based on your website content. The Paypal payment was modified and extended; you can create shopping carts for files you want sell and the generated e-books.
