## Joseph A Slave Craft:

The Price of Freedom T. Stephen Whitman, 2021-05-11 A stereotypical image of manumission is that of a benign plantation owner freeing his slaves on his deathbed But as Stephen Whitman demonstrates the truth was far more complex especially in border states where manumission was much more common Whitman analyzes the economic and social history of Baltimore to show how the vigorous growth of the city required the exploitation of rural slaves To prevent them from escaping and to spur higher production owners entered into arrangements with their slaves promising eventual freedom in return for many years hard work The Price of Freedom reveals how blacks played a critical role in freeing themselves from slavery Yet it was an imperfect victory Once Baltimore's economic growth began to slow freed blacks were virtually excluded from craft apprenticeships and European immigrants supplanted them as a trained labor force **Free Negro Owners of**

**Scribe** Steve Vinson, 2017-11-06 In The Craft of a Good Scribe Steve Vinson offers a comprehensive study of the Demotic Egyptian First Tale of Setne Khaemwas Third Century BCE the first to appear since 1900 First Setne is the most important extant Demotic literary text and among the most important fictional compositions from any period of ancient Egypt The tale which is by turns lurid tragic and ultimately comic deals with Setne's theft of a magic book written by the god Thoth himself and subsequently Setne's punishment through a hallucinatory encounter with the ghostly femme fatale Tabubue Vinson provides a new textual edition and commentary and explores the tale's cultural background its modern reception and approaches to its interpretation as a work of literature This Abominable Slavery W Paul Reeve, History Department and

Simmons Chair of Mormon Studies W Paul Reeve, Christopher B Rich, Lajeane Purcell Carruth, 2024-10-18 This eye opening volume draws extensively on previously unused sources to chronicle the 1852 Utah territorial legislative session during which the legislature passed two important statutes one that legally transformed African American slaves into servants but did not pass the condition of servitude on to their children and another that authorized twenty year indentures for enslaved Native Americans This Abominable Slavery places these debates within the context of the nation's growing sectional divide and contextualizes the meaning of these laws in the lives of Black enslaved people and Native American indentured servants

Medieval Translators and Their Craft Jeanette M. A. Beer, 1989 At

no time in the history of the West has translation played a more vital role than in the Middle Ages Centuries before the

appearance of the first extant vernacular documents bilingualism and preferably trilingualism was a necessity in the scriptorium and chancery and since the emergence of Romance had rendered the entire corpus of classical literature incomprehensible to all but the literati both old and new worlds awaited re discovery or to use Jerome s metaphor conquest The diversity of medieval translation is illustrated although not encompassed by the diversity of chapters in the present volume Authors treat the methods and reception of translators of vernacular to Latin and vernacular to vernacular texts of a variety of genres and many different languages and periods The collection will present a welcome offering of different scholarly approaches to the critical issue of medieval translators and their craft

**The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
