Listening Ear Trainer - User's Manual (v1.06) F. Rudin, To train your ear, one must learn to distinguish sounds. Acquiring Perfect Pitch requires, in addition to remembering pitches, in early childhood we collect the vast part of our relevant sound memory by imitating the sounds with our vocal cords. However, our brain doesn't stop there. At a later age, we can still learn a new foreign language. Three new methods to acquire Absolute Pitch and Relative Pitch, supported by software feedback, are presented in this book. The first method, the Singing Funnel method, lets you acquire Absolute Pitch like a foreign language. The second method, the Octave Anchor Pitch method, helps you to orientate yourself in the pitch realm. The last method, the Interval Overtone method, improves your interval hearing.
