DeLorenzo, 2015-10-23 This book examines how music education presents opportunities to shape democratic awareness through political pedagogical and humanistic perspectives Focusing on democracy as a vital dimension in teaching music the

essays in this volume have particular relevance to teaching music as democratic practice in both public schooling and in teacher education. Although music educators have much to learn from others in the educational field, the actual teaching of music involves social and political dimensions unique to the arts. In addition, teaching music as democratic practice demands a pedagogical foundation not often examined in the general teacher education community. Essays include the teaching of the arts as a critical response to democratic participation, exploring democracy in the music classroom with such issues as safe spaces, sexual orientation, music of the Holocaust, improvisation, race, and technology, and music teaching music teacher education as a form of social justice. Engaging with current scholarship, the book not only probes the philosophical nature of music and democracy but also presents ways of democratizing music curriculum and human interactions within the classroom. This volume offers the collective wisdom of international scholars, teachers, and teacher educators and will be essential reading for those who teach music as a vital force for change and social justice in both local and global contexts.

**Navigating the Landscape of FAIR Data Sharing and Reuse: Repositories, Standards, and Resources** Maaïke M. H. Van Swieten, Christian Haselgrove, 2024-03-08. The huge volume of neuroscience data and the wide variety of data formats generated across different neuroscience communities has posed a challenge to traditional methods of data management, data sharing, and data mining. Mandates on data sharing and the demand for using open data has driven the development of advanced methodologies and tools to effectively explore, mine, and integrate data. However, the growing number of resources make it harder for researchers to navigate this landscape. Awareness of these tools and resources is vital for effective data mining and unlocking new discoveries. The goal of this research collection is to provide an overview of available resources centred around making data findable, accessible, interoperable, and reusable (FAIR).
