The only book to not only discuss the technicalities of the European REACH chemicals registration process but also to directly address the resulting business risks and business solutions In this text for practitioners the author pulls together the key knowledge needed to successfully run a business under REACH distilling thousands of pages of official documentation and incorporating experiences from different sized enterprises in a global context Starting with the basics of the REACH framework she explains the entire process on how to register with the European ECHA office with a particular emphasis on small and medium sized businesses Along the way she describes key milestones and presents sample documents from real case studies The final part of the book addresses strategies to ensure a reach compliant operation including recommendations for in house processes as well as communicating with suppliers and downstream users As a result managers in the pharmaceuticals and chemicals industries will learn how to operate their companies in full compliance with REACH standards *Documentation Abstracts* ,1996 **ICIS Chemical Business Americas** ,2007 **Persistence**

**and Spatial Range of Environmental Chemicals** Martin Scheringer, 2002 Using conventional methodology chemical risk assessment for the hundreds of thousands of chemicals currently in use is a near impossible task Martin Scheringer has pioneered the development of a new concept based on the criteria of persistence and spatial range and in this book he provides the first coherent introduction The concept simplifies the assessment of chemicals while still providing meaningful evaluation criteria The author outlines the features of persistence and spatial range as measures of environmental threats before going on to explain the quantification of these criteria One unique feature of this book is that it covers both scientific and ethical aspects since scientific arguments are necessary yet insufficient for political decisions A glossary of terms aids comprehension of this interdisciplinary topic while numerous references provide access to the primary literature Essential reading for everybody needing to stay in touch with the progress being made in scientific research on environmental chemicals or the current debate on international policy negotiations **Bibliography of Agriculture** ,1996
