

Memorandum of Advice

To: Supervising Partner

From: Sofian Mui

Subject: Proposed Artificial Intelligence Systems for Mergers & Acquisitions

Date: 5 September 2022

Word count: **2010**

EXECUTIVE SUMMARY

1. The work requested by the client is summarised into three sections: contract drafting and review, and due diligence.
2. The recommendation is for the firm to consider implementing artificial intelligent software focusing on Natural Language Processing ("NLP") and Intelligent Documents Processing ("IDP") to effectively perform the work required. Extensive research on market and product availability has been completed to provide a substantive recommendation that the firm considers adopting the following software products, 'Kira Due Diligence' to improve due diligence processes, and either 'UnPath' and/or 'LawGeex' to assist with the firms contract review.
3. Further, in order to minimise potential risks, it is proposed that the firm look to implement these technologies gradually, whilst maintaining compliance with existing regulatory bodies within the legal industry.

I. INTRODUCTION

Technological advances in artificial intelligence ("AI") systems have impacted not only the economy and society, but also in the legal industry, creating a substantial increase in global and domestic competition for outsourcing legal work, the delivery of legal services and skills by solicitors.¹ AI technological advances have potential to improve a firms effectiveness and efficiency. For example, AI closes the gap by efficiently reviewing existing documents and mitigating the likelihood of a negative outcome from occurring when missing, incorrect, or contradictory language is not identified by humans. These advances present an unprecedented ability to avoid the most susceptible mistakes and costly causes of disputes.² No doubt, contract review and due diligence can be very time consuming, costly,

The Next Generation of Testing Hong Jiao, Robert W. Lissitz, 2015-11-01 The Race To The Top RTTP federal education policy fostered a new generation of state tests This policy advocated adopting common core standards which set a higher level of learning targets for students in the US K 12 education These standards are intended to assess higher order thinking skills and prepare students ready for college and career In the meantime they are aligned with those for international assessments which keep US students abreast of their international peers Furthermore the new generation of state tests requires the use of technology enhanced items to align student assessments with student learning environment Computer technology is indispensable to accomplish this goal Computer based tests related to common core standards are different from previous state computer based tests in two important aspects one is that the current version requires accurate assessment of students along all ability levels and the other is that it promotes the use of an efficient test delivery system essentially the use of computerized adaptive assessment in K 12 state testing programs In addition to providing summative information about student learning the new common core tests add formative assessment component in the whole assessment system to provide timely feedback to students and teachers during the process of student learning and teacher instruction As with its predecessor the new assessment policy also holds teachers and schools accountable for student learning With the requirements by the new federal education policy states formed two consortia Partnership for Assessment of Readiness for College and Careers PARCC and Smarter Balanced Assessment Consortium SBAC to develop assessments in alignment with the new common core standards This book is based on the presentations made at the Thirteenth Annual Maryland Assessment Research Center's Conference on The Next Generation of Testing Common Core Standards Smarter Balanced PARCC and the Nationwide Testing Movement Experts from the consortia and nationwide overviewed the intention history and the current status of this nationwide testing movement Item development test design and transition from old state tests to the new consortia tests are discussed Test scoring and reporting are specially highlighted in the book The challenges related to standard setting for the new test especially in the CAT environment and linking performance standards from state tests with consortium tests were explored The issues of utilizing the consortium test results to evaluate students

college and career readiness is another topic addressed in the book The last chapters address the critical issue of validity in the new generation of state testing programs Overall this book presents the latest status of the development of the two consortium assessment systems It addresses the most challenging issues related to the next generation of state testing programs including development of innovative items assessing higher order thinking skills scoring of such items standard setting and linkage with the old state specific standards and validity issues This edited book provides a very good source of information related to the consortium tests based on the common core standards Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Oxford Textbook of Palliative Nursing** Betty Rolling Ferrell, Judith A.
