## Le Big Bang Est-il Un Mythe:

*Le big bang est-il un mythe ?* Jean-François Robredo, 2014-05-07 Depuis les premiers philosophes comprendre l'univers c'était lui donner un ordre en faire un cosmos Les penseurs grecs utilisaient des principes appliqués a priori sur la réalité Mais la science moderne surtout depuis Galilée a quantifié l'expérience et le réel sur les principes Peu à peu la science s'est imposée pour répondre aux grandes questions de l'homme dont celle de l'origine de l'univers Au XX<sup>e</sup> siècle un récit complet de l'histoire de l'univers a été élaboré le big bang Dès lors le conflit avec les affirmations philosophiques ou religieuses s'est de nouveau revêtu La science peut-elle s'imposer face aux croyances rivales Le big bang est-il la vérité objective ou une projection de notre idéologie scientifique L'ouvrage reprend toute l'histoire de la cosmologie moderne pour en montrer les forces et les faiblesses Il actualise aussi le débat entre science et religion sur la question des origines Enfin il analyse la manière dont la science progresse construit ses certitudes ou impose ses illusions

**La Pensée**, 1986 **History of Chicago** Alfred Theodore Andreas, 1884 **Comment est né l'Univers**, 2001 **Big Bang** Jean-Pierre Luminet, Hervé Roy, **Le big bang** Heather Couper, Nigel Henbest, Corbella, 1997 Un livre clair et fascinant pour tout comprendre sur les origines de l'Univers SAVOIR Qu'y avait-il avant le Big Bang Comment la matière de l'Univers est-elle apparue Pourquoi les galaxies s'éloignent-elles les unes et les autres Y a-t-il une limite à l'Univers Quel est l'âge de l'Univers DECOUVRIR Comment les astronomes ont détecté le rayonnement fossile du Big Bang Comment un autre big bang pourrait avoir lieu Ce qui sera le destin de l'Univers COMPRENDRE Les trois premières minutes de l'Univers L'inflation cosmique Les particules élémentaires La matière et l'antimatière

[Le mythe moderne du big bang](#) Jacques Dorotte, 1999 [Bizarre Big Bang](#) Philippe Miné, 2001 Big Bang est devenu un terme du langage courant Biologistes sociologues économistes ou politiciens l'ont emprunté aux physiciens et aux astronomes les théologiens s'y réfèrent les lycéens le trouvent même dans leurs manuels Est-ce un mythe moderne ou une théorie scientifiquement établie La cosmologie peut-elle être une science comme les autres L'Univers est-il éternel ou mortel fini ou infini courbe ou plat et dans combien de dimensions Peut-on prédire précisément son comportement durant ses premières fractions de seconde alors que son âge n'est connu qu'à deux milliards d'années près Einstein a-t-il fait la plus grosse bêtise de sa vie en imaginant une constante cosmologique ou a-t-il anticipé les observations du troisième millénaire Que nous apprennent la couleur du ciel nocturne et les propriétés des particules élémentaires Bizarre bizarre L'auteur raconte cette époque sans crêper le chapeau mais n'oublie pas la philosophie l'histoire des sciences ni les petites histoires des scientifiques

until the accidental discovery of cosmic radiation many years later that the scientific community finally came to accept this man and his ideas In just 50 minutes you will Understand Georges Lema tre s theories of the expansion of the universe and of the primeval atom now known as the Big Bang theory Find out about his life and determination to reconcile his Catholic faith with his interest in physics Learn about the accidental discoveries that eventually led to the confirmation of his theories ABOUT 50MINUTES COM History Culture 50MINUTES COM will enable you to quickly understand the main events people conflicts and discoveries from world history that have shaped the world we live in today Our publications present the key information on a wide variety of topics in a quick and accessible way that is guaranteed to save you time on your journey of discovery **Le big bang** Joseph Silk,1999 Joseph Silk est aujourd'hui un des meilleurs sp cialistes de l'astrophysique et de la cosmologie Gr ce sa vaste culture scientifique sa comp tence et la qualit de son jugement face aux diff rentes interpr tations des donn es d'observation il s'est acquis une haute r putation comme th oricien et comme synth tiseur des connaissances Le Big Bang est depuis des ann es un classique de la vulgarisation Remis date de nombreuses fois il para t enfin en fran ais Je suis heureux de pr senter au public int ress par l'astronomie cette uvre remarquable Hubert Reeves

fundamental explanations of the origin and future of our universe and of human life P 4 of cover      **The Big Bang** Joseph Silk,1989 Describes the Big Bang scientific theory of creation of the universe      **The Big Bang** Timothy E Eastman,Hilton Ratcliffe,Ashwini Kumar Lal,2011-10-21 The theory that has come to be known as The Big Bang was originally proposed by a Catholic Priest to make the Bible Scientific Critics of the Big Bang theory have subsequently referred to this theory as religion masquerading as science Nevertheless the Big Bang model is the generally accepted theory for the origin of universe Nonetheless findings in observational astronomy and revelations in the field of fundamental physics over the past two decades question the validity of the Big Bang model as a viable theory for the origin of the universe There are numerous factors which undermine the theory of the Big Bang including the organization of galactic superstructures the Cosmic Microwave Background distant galaxies gravitational waves red shifts and the age of local galaxies Admittedly the Big Bang research program has been successful in generating fruitful scientific hypotheses and tests and there has been some confirmation for many hypotheses However outstanding questions remain and substantial alternative cosmology models which also have been fruitful remain viable and continue to evolve Unfortunately there has been a concerted effort to prevent research into alternate cosmologies The Big Bang has become a sacred cow which must not be questioned One of the greatest challenges facing astrophysics is derivation of remoteness in cosmological objects At large scales it is almost entirely dependent upon the Hubble relationship between apparent brightness and spectral redshift for large luminous objects However this data has questionable validity The assumption of scale invariance and universality of the Hubble law allowed the adoption of redshift as a standard calibration of cosmological distance However there have been several fields of study in observational astronomy that consistently give apparently anomalous results from ever larger statistical samples and would thus seem to require further careful investigation A major problem is that the Big Ba Big Bang model implies the existence of a creator Why the Universe should have had a beginning or why it would have been created cannot be explained by classical or quantum physics To support the Big Bang estimates of the age and size of the cosmos including claims of an accelerating universe are based on an Earth centered universe with the Earth as the measure of all things exactly as dictated by religious theology However distance from Earth is not a measure of the age of far away galaxies The Big Bang cannot explain why there are galaxies older than the Big Bang why fully formed galaxies continue to be discovered at distances of over 13 billion light years from Earth when according to Big Bang theory no galaxies should exist at these distances To support the Big Bang red shifts are purposefully misinterpreted based on Pre Copernican geo centrism with Earth serving as ground zero However red shifts are variable effected by numerous factors and do not provide measures of time age or distance Nor can Big Bang theory explain why galaxies collide why rivers of galaxies flow in the wrong direction why galaxies clump together creating great walls of galaxies which took from 80 billion to 150 billion years to form Big Bang theory requires phantom forces constantly adjusted parameters and ad hoc theorizing to explain away and to cover up the numerous

holes in this theory Finally if at first there was a singularity then the Big Bang was not a beginning but a continuation

**Beyond the Big Bang** Paul A. LaViolette,1995      *Genesis of the Big Bang* Ralph A. Alpher,Robert Herman,2001-02-08

The authors of this volume have been intimately connected with the conception of the Big Bang model since 1947 Following the late George Gamow s ideas in 1942 and more particularly in 1946 that the early universe was an appropriate site for the synthesis of the elements they became deeply involved in the question of cosmic nucleosynthesis and particularly the synthesis of the light elements In the course of this work they developed a general relativistic model of the expanding universe with physics folded in which led in a progressive logical sequence to our prediction of the existence of a present cosmic background radiation some seventeen years before the observation of such radiation was reported by Penzias and Wilson In addition they carried out with James W Follin Jr a detailed study of the physics of what was then considered to be the very early universe starting a few seconds after the Big Bang which still provides a methodology for studies of light element nucleosynthesis Because of their involvement they bring a personal perspective to the subject They present a picture of what is now believed to be the state of knowledge about the evolution of the expanding universe and delineate the story of the development of the Big Bang model as they have seen and lived it from their own unique vantage point      **In Search of the Big Bang** John R.
