Mathematics June 2013 Paper 1 Memo:

Cognitive Communication and Cooperative HetNet Coexistence Maria-Gabriella Di Benedetto, Faouzi Bader, 2014-01-16

This book written by experts from universities and major industrial research laboratories is devoted to the very hot topic of cognitive radio and networking for cooperative coexistence of heterogeneous wireless networks. Selected highly relevant advanced research is presented on spectrum sensing and progress toward the realization of accurate radio environment mapping, biomimetic learning for self-organizing networks, security threats with a special focus on primary user emulation attack and cognition as a tool for green next generation networks. The research activities covered include work undertaken within the framework of the European COST Action IC0902 which is geared towards the definition of a European platform for cognitive radio and networks. Communications engineers, R & D engineers, researchers and students will all benefit from this complete reference on recent advances in wireless communications and the design and implementation of cognitive radio systems and networks.

Global Flood Hazard Guy J.-P. Schumann, Paul D. Bates, Heiko Apel, Giuseppe T. Aronica, 2018-06-05
Global Flood Hazard Subject Category Winner PROSE Awards 2019 Earth Science. Selected from more than 500 entries demonstrating exceptional scholarship and making a significant contribution to the field of study. Flooding is a costly natural disaster in terms of damage to land property and infrastructure. This volume describes the latest tools and technologies for modeling, mapping and predicting large scale flood risk. It also presents readers with a range of remote sensing data sets successfully used for predicting and mapping floods at different scales. These resources can enable policymakers, public planners and developers to plan for and respond to flooding with greater accuracy and effectiveness. Describes the latest large scale modeling approaches including hydrological models, 2-D flood inundation models and global flood forecasting models. Showcases new tools and technologies such as Aqueduct, a new web based tool used for global assessment and projection of future flood risk under climate change scenarios. Features case studies describing best practice uses of modeling techniques, tools and technologies. Global Flood Hazard is an indispensable resource for researchers, consultants, practitioners and policy makers dealing with flood risk, flood disaster response, flood management and flood mitigation.

Studies in Intelligence, 2016 Social Robots in Education Georgios Lampropoulos, Stamatios Papadakis, 2025-05-03

This book focuses on recent advances in the field of social robots and their integration in education. It elaborates on the progressive evolution of human robot interaction and educational robotics, the emergence of digital pedagogy and the implementation of personalized learning methodologies. The book also examines the use of artificial intelligence (AI) in education through the lenses of social robots. Hence the book offers an overview of recent research into the adoption, integration, advancements and impact of social robots and AI in education and presents guidelines and suggestions on how to integrate them in classrooms. Specifically the book provides an in-depth overview of social robots and their use in education. Presents the advances of social robots and AI in education. Showcases innovative solutions and outcomes of integrating social

robots in classrooms Discusses the challenges benefits and future research directions of using social robots and AI in education

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

What's Our Problem? Tim Urban,2023-02-21 From the creator of the wildly popular blog Wait But Why a fun and fascinating deep dive into what the hell is going on in our strange unprecedented modern times Between 2013 and 2016 Tim Urban became one of the world s most popular bloggers writing dozens of viral long form articles about everything from AI to colonizing Mars to procrastination Then he turned his attention to a new topic the society around him Why was everything such a mess Why was everyone acting like such a baby When did things get so tribal Why do humans do this stuff This massive topic sent Tim tumbling down his deepest rabbit hole yet through mountains of history evolutionary psychology political theory neuroscience and modern day political movements as he tried to figure out the answer to a simple question What s our problem Six years later he emerged from the hole holding this book What s Our Problem is a deep and expansive analysis of our modern times in the classic style of Wait But Why packed with original concepts sticky metaphors and 300 drawings The book provides an entirely new framework and language for thinking and talking about today s complex world Instead of focusing on the usual left center right horizontal political axis which is all about what we think the book introduces a vertical axis that explores how we think as individuals and as groups Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them Anyway he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book
