The Cambridge Handbook of Instructional Feedback Anastasiya A. Lipnevich, Jeffrey K. Smith, 2018-11-15 This book brings together leading scholars from around the world to provide their most influential thinking on instructional feedback. The chapters range from academic in depth reviews of the research on instructional feedback to a case study on how feedback altered the life course of one author. Furthermore, it features critical subject areas including mathematics, science, music, and even animal training, and focuses on working at various developmental levels of learners. The affective and non-cognitive aspects of feedback are also targeted, such as how learners react emotionally to receiving feedback. The exploration of the theoretical underpinnings of how feedback changes the course of instruction leads to practical advice on how to give such feedback effectively in a variety of diverse contexts. Anyone interested in researching instructional feedback or providing it in their class or course will discover why, when, and where instructional feedback is effective and how best to provide it.

The Wiley International Handbook of Educational Foundations Alan S. Canestrari, Bruce A. Marlowe, 2018-11-20 Promotes a model of critique for teachers, scholars, and policy makers to challenge established educational practice in a global context. The Wiley International Handbook of Educational Foundations features international scholars uniquely qualified to examine issues specific to their regions of the world. The Handbook provides readers with an alternative to the traditional texts in the foundations of education by taking aim at the status quo and by offering frameworks from which teachers and scholars of education can critically evaluate schools and schooling. Throughout the essays are grounded in a broad historical context, and the authors use an international lens to examine current controversies in order to provoke the kinds of discussion crucial for developing a critical stance. The Handbook is presented in six parts, each beginning with an Introduction to the subject. The sections featured are: Part I Challenging Foundational Histories and Narratives of Achievement; Part II Challenging Notions of Normalcy and Dominion; Part III Challenging the Profession; Part IV Challenging the Curriculum; Part V Challenging the Idea of Schooling; and Part VI Challenging Injustice, Inequity, and Enmity. The Wiley International Handbook of Educational Foundations offers unique insight into subjects such as Educational reform in India, Pakistan, and China; The global implications of equity-driven education; Teacher education and inclusionary practices; The Global Educational Reform Movement; GERM Education and the arts; Maria Montessori and Loris Malaguzzi; Legal education in authoritarian Syria. The Wiley International Handbook of Educational Foundations is an important book for current and aspiring educators, scholars, and policy makers.

Mathematics education is heavily emphasized worldwide but it is still considered to be a stumbling block for many students. While there is near consensus that mathematics problems appropriate for the twenty first century should be

complex unfamiliar and nonroutine CUN most of the textbooks still include mainly routine problems based on the application of ready made algorithms The time has come to introduce innovative instructional methods to enhance mathematics education and students ability to solve CUN tasks Metacognitive pedagogies which explicitly train students to think about their thinking can play a key role These pedagogies can be used to improve not just academic achievement for example content knowledge and the ability to handle unfamiliar problems but also affective outcomes such as anxiety and motivation The strong relationship between metacognition and schooling outcomes has implications for both the education community and policymakers Testing, Failing, Cramming, Cheating, Passing, Etc Lowry Waring Harding,1977 Results and Interpretations of the 2003 Mathematics Assessment of the National Assessment of Educational Progress Peter Kloosterman, Frank K.
