Experiences and Emotions in Finland, 1800-2000 Ville Kivimäki, Sami Suodenjoki, Tanja Vahtikari, 2021-06-07 This open access book uses Finland in the nineteenth and twentieth centuries as an empirical case in order to study the emergence shaping and renewal of a nation through histories of experience and emotions It revolves around the following questions What kinds of experiences have engendered national mobilization and feelings of national belonging How have political and societal conflicts turned into new communities of experience and emotion What kinds of experiences have been integrated into or excluded from the national context in different instances How have people internalized or contested the nation as a context for their personal family and minority group experiences In what ways has the nation entered and affected people's intimate spheres of life How have national experiences been transmitted to children in the renewal of the nation This edited collection points to the histories of experience and emotions as a novel way of studying nations and nationalism Building on current debates in nationalism studies it offers a theoretical framework for analyzing the historical construction of lived nations and introduces a number of new methodological approaches to understand the experiences of the nation extending from the investigation of personal reminiscences and music records to the study of dreams and children's drawings

Terrains of Imagination in Contemporary Finnish Literature Sarianna Kankkunen, 2024-12-24 This study examines experienced space in Maarit Verronen's works of prose fiction The study aligns itself with the contemporary approach often referred to as spatial literary studies a movement connected to the spatial turn within the humanities Theoretically the study draws on multiple fields of spatial studies from semiotics of space to critical theory and poststructuralism By providing a categorization on different approaches within spatial literary studies the study promotes literary studies that utilize spatial theory and explores how spatial concepts can be effectively used as tools for close reading Since the study aims to provide a longitudinal section of Verronen's oeuvre the selected material spans the author's early works from the 1990s to the late 2000s The corpus involves six novels and two short stories The analysis begins with the fantastic realms of Verronen's early career proceeds to consider wilderness and wild spaces turns to visions of dystopic futures and concludes in the narratives of homecoming and homesteading The study shows that Verronen's fantasy draws its allegorical potential from the juxtaposition of spatialized binary semantic oppositions By analyzing Verronen's dystopian novels the study unravels the

spatial nature of the genre and the critical potential it encompasses Verronen's narratives on wilderness are approached through the notion of spatial practices and in the context of alienation and postpastoralism Finally the analysis on the literary homes and the acts of homesteading in Verronen's novels foregrounds the open connected and inclusive nature of the contemporary notion of home and new forms of attachment to place both of which are under an active debate in spatial literary studies By bringing together spatial literary studies and Verronen's works this research adds to the study of Finnish literature and contemporary literature's emphasis on space spatiality and environmental issues Moreover the study contributes to the knowledge on the genres of fantasy and dystopia as well as to the study of classic literary tropes and their contemporary manifestations As the study contextualizes Verronen's works within Nordic and European literatures it draws attention to the thematic and stylistic connections that link her writing to broader literary trends and traditions

From Finland contains a series of individual biographical studies dedicated to those who in their own spheres of life have made important contributions to the development of Finnish society. The articles came into being as part of the National Biography of Finland which contains 6000 brief biographies edited by the Finnish Historical Society. The collection is not just an introduction to individuals; however, as the closely interwoven articles provide an overall view of Finland's human resources and expertise over the centuries. The book's time span stretches through three different cultural and political ages: The Middle Ages until 1809 when Finland was a part of the Swedish Realm; from 1809 to 1917 when it was a Russian Grand Duchy; and since 1917 when it has been an independent state. The collection contains in equal proportions people who are well known for their contributions to society and those who are famous in the arts and sciences. Political life is represented by the Presidents of the Republic and the less exalted ranks of society by church builders and hunters. Cultural figures known to an international public, from the architect Alvar Aalto to the composer Jean Sibelius or from the painter Helene Schjerfbeck to the glass artist Tapio Wirkkala, are also presented in the book.
