of Michigan's School of Education and Carnegie Foundation **Novice Mathematics Teachers' Professional Learning** Xiaoli Lu, 2022-05-04 This book investigates three novice high school mathematics teachers' professional learning processes in the early stages of their careers at schools in Shanghai, China. Teacher professional learning is examined as a complex and dynamic system that connects both cognitive and situated perspectives on learning theory. Inspiring mathematics teachers to adopt student-focused pedagogies is challenging, particularly in China, where tensions in teacher-centred, content-focused and examination-oriented practices are predominant. The three novice teachers who participated in this study brought different beliefs and knowledge derived from their different individual experiences to bear on their teaching practices. However, they were strongly influenced by the environments in which they taught and mainly adopted a professional learning approach to teacher-centred practices despite reporting that they favoured student-centred teaching practices. The study also observed professional learning towards student-centred pedagogical aspects in a single teacher case with mentorship support, indicating that student-centred pedagogies may be promoted within the constraints of the existing dominant teaching practice.

Educating for Citizenship in a Canada-China Sister School Reciprocal Learning Partnership Yishin Khoo, 2022-12-13 This book enriches the discourse around Global Citizenship Education in teacher education through the example of a teacher's experience in a Canada-China Sister School reciprocal learning landscape. Instead of positioning global citizenship teaching and learning as a set of fixed goals to be attained by teachers alone, this book approaches global citizenship teaching and learning as unfinished lifework in progress and as situated curriculum problems to be inquired together by university researchers, school teachers and students under the spirit of reciprocity and community. This reimagining of narratives theory and action start from collaborative and reciprocal learning partnerships among Chinese and Canadian researchers and teachers in the practicality of re-searching and re-enacting the purpose and meanings of twenty-first century education in a Canada-China Sister School setting.

Count Girls In Karen Panetta, Katianne Williams, 2018-08-01 To succeed in science and tech fields today, girls don't have to change who they are. A girl who combines her natural talents, interests and dreams with STEM skills has a greater shot at a career she loves and a salary she deserves. The authors present compelling research in a conversational, accessible style and provide specific advice and takeaways for each stage of schooling from elementary school through college, followed by comprehensive STEM resources. This isn't a book about raising competitive, test-acing girls in lab coats; this is about raising happy, confident girls who realize the world of opportunities before them.
