Teaching Reading Comprehension to English Learners in Secondary Schools: A Research-Based Approach

Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23 Teaching reading comprehension to English learners ELs in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school.

Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies, and teacher training and is a useful resource for academicians, researchers, and scientists.

Leading Change in Teacher Education Thuwayba Al Barwani, Maria Assunção Flores, David Imig, 2018-12-12 The international attempt to expand schooling despite dealing with an insufficient number of trained teachers has placed significant pressure on teacher education. Continued effort to change all aspects of teacher education, including ways of learning, methods of practice, institution interaction, and assessment of teaching ability, in order to fulfil the desire to offer inclusive and equitable teaching for all, is a serious consideration. In response to this increased attention on cross-national campaigns, *Leading Change in Teacher Education* features discussions covering what has been done, how, and why the change has happened, the journey itself, and the challenges encountered along the way, alongside contributions from international academics who share their reflections and suggestions for a way forward despite a global shortage of teachers. Strategies surrounding the design and delivery of education now centre on improving how teachers are prepared, supported, and evaluated. *Leading Change in Teacher Education* captures the stories of international change leaders by providing details of both the successes and challenges faced. Presenting innovative practices in teacher education from around the world, describing the strategies put in place to ensure that teacher education is developing. The topics discussed are relevant for educators, policymakers, and international organizations involved in the design and implementation of programmes in teacher education. *Leading Change in Teacher Education* is also an invaluable resource for those looking to increase the changes occurring within teacher education.
