The Original Copy Roxana Marcoci, Geoffrey Batchen, Tobia Bezzola, 2010 Since its birth in the first half of the 19th century photography has offered extraordinary possibilities of isolating works of art for study and pleasure Through cropping focus angle of view distance and lighting as well as the ex post facto techniques of dark room manipulation collage montage and assemblage photographers not only interpret the artworks they record but create stunning reinventions *The Original Copy Photography of Sculpture 1939 to Today* presents a critical examination of the intersections between photography and sculpture Through a selection of nearly 300 outstanding pictures by more than 100 artists from the 19th century to the present *The Original Copy* explores how one medium has become implicated in the understanding of the other Photographs reproduced in this richly illustrated volume range in subject from inanimate objects to performing bodies and include major works by medium s most influential artists from early modernism to the present

The Architecture of Error Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline s needs anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In *The Architecture of Error* Francesca Hughes argues that behind the architect s acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes s analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable
