Seeing Style Niklas Woermann,2024-12-23 How do social practices prefigure experiences and how does embodied experience organize the performance of practices This book suggests that the classic concept of style offers a fresh answer to the question how doings and sayings are linked into practice bundles Based on a rich ethnographic study of the visual practices of the German speaking freeskiing subculture this work develops a theory of phenopractices or embodied cultural practices dedicated to apprehending and expressing style Focusing on the visual dimension it extends the thought of Garfinkel and Schatzki using recent insights from science and technology studies and research at the intersection of neuroscience and phenomenology This offers a new perspective on fundamental practice theoretical questions about the nature of practice elements social order in the context of rules and regularity or action and practical intelligibility Each chapter discusses and develops foundational concepts such as time space action emotion or perception based on an analysis of freeskiing practices such as planning a route in the backcountry testing a new ski model or judging freestyle contests The central argument is that cultural styles of conduct are not only symbolic structures but a functional resource which organizes situational intelligibility and thus enables social order based on aligned and managed embodied routines Because the stabilization dissemination and evolution of such styles happens via different media practice change is primarily influenced by media rather than symbolic rational or functional needs or ends A rich ethnography and provocative theoretical argument of interest to anyone working on contemporary practice thought advancing phenomenology the sociology of vision lifestyle sports media or practice evolution *The Congregationalist and Christian World* ,1906 **The New York Times Index** ,2009 *No Way Down* Graham Bowley,2010-06-29 New York Times Bestseller A refreshingly unadorned account of the true brutality of climbing K2 where heroes emerge and egos are stripped down and the only thing achieving immortality is the cold ruthless mountain Norman Ollestad author of *Crazy for the Storm* In this riveting work of narrative nonfiction New York Times journalist Graham Bowley re creates one of the most dramatic tales of death and survival in mountaineering
