Reid, 2020-11-18 A New World System From Chaos to Sustainability examines the present crisis in the social and ecological environment that is producing profound potentially catastrophic challenges to the planet and humanity and outlines a process for moving forward to address these critical issues This book is a cautionary interpretation of the present and vision for the future Unlike other books on this or allied subjects that are focused singularly Part 1 surveys the five major threats facing humanity today climate change inequality and poverty new technologies migration and globalization It approaches the challenge of integrating these phenomena into a global picture from a systems perspective rather than taking a purely reductionist approach to
