In real life there aren't artificial barriers between subjects. For example, when you are cooking or baking, you have to use the skills of reading, logical thinking and measuring, just to name a few. In driving a car, you see and read road signs, read maps and count miles. It has become quite clear that there is an abundance of math curriculums available that are nothing but monotonous drill sheets dressed up in pretty colors. Pretty colors do not make a living book. Content, story and the ability to show math in real life make a living math book. **Math Level 1** Teach math lessons through the creative means of a life story. Provides a link for the downloadable answer key. Has a scope and sequence that contains learning numbers 0 to 100, circles and patterns, counting and addition, days of the week and telling time. This book was written to be used by you and your young student together. It is the story of a twin brother and sister, Charlie and Charlotte, who are visiting their grandparents' farm. They soon learn that the farm is full of learning opportunities. As you read their story, your students will be drawn into the adventure along with the twins. They will learn about numbers, shapes, place value, adding and subtracting. They will also learn about gardening, baby animals on the farm, nature and the love of family. They will hear exciting stories from Grandpa and Grandma and they will be invited to join the twins on their living math adventures. We hope you have a grand time on this adventure. **Meaningful Mini-Lessons & Practice: Mathematics Gr 1 Teacher Resource** Newmark Learning, 2019 Meaningful Mini Lessons Mathematics for Grade 1 **Developing Numeracy** Peter Patilla, 2002-01-01 A photocopiable activity book for the daily mathematics lesson covering the Calculations strand of the Numeracy Strategy.
