Critical Perspectives on PISA as a Means of Global Governance António Teodoro, 2022-03-24 This volume offers a critical examination of the Programme for International Students Assessment PISA focusing on its origins and implementation relationship to other international large scale assessments and its impacts on educational policy and reform at national and cross national levels Using empirical data gathered from a research project carried out by the CeIED at Lusofona University Lisbon the text highlights connections between PISA and emergent issues including the international circulation of big science expertise and policy and identifies its conceptual and methodological limits as a global governance project The volume ultimately provides a novel framework for understanding how OECD priorities are manifested through a regulatory instrument based on Human and Knowledge Capital Theory and so makes a powerful case to search for new humanistic approaches This text will benefit researchers academics and educators with an interest in education policy and politics international and comparative education and the sociology of education more broadly Those interested in the history of education will also benefit from this volume

Current Perspectives on the Value, Teaching, Learning, and Assessment of Design in STEM Education Jeffrey Buckley, Eva Hartell, Nicolaas Blom, 2023-08-25 Design is a central activity within Science Technology Engineering and Mathematics STEM education Within enacted practice design can feature within intended learning outcomes for example in learning to design and it can feature within pedagogical methodologies for example by learning through design Often holding differing disciplinary interpretations such as design as cyclical problem solving iterative design conceptual design or design with or without make understanding the educational merits of the ill defined and open nature of authentic designerly activity is paramount This Research Topic sets out to gain a more nuanced understanding of the value and role s of design within STEM educational contexts This Research Topic focuses on design within STEM educational contexts particularly in terms of teaching learning and assessment The aim is to contribute to the evidential basis which can be used to guide the incorporation of design into educational practice The topic has two central research objectives The first is to generate evidence regarding what design is in STEM education For example is the ability to design a singular or manifold construct Is

the capacity to design or are factors of this ability both learnable and teachable How transferable is designerly knowledge between contexts How do different disciplinary contexts influence the interpretation of design The second is to further our understanding of how best to incorporate design within STEM education contexts For example how much emphasis should be placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education *Commerce Business Daily* ,1997-12-31 *Who's who in America* Harriet L.
