## **Maths Lit Grd11 2013:**

*Research for Educational Change* Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses, that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice, the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

*The Palgrave Handbook of Race and Ethnic Inequalities in Education* Peter A.J. Stevens, A. Gary Dworkin, 2019-07-05 This authoritative state of the art reference work builds on its first edition to provide a cutting edge systematic review of the relationship between race, ethnicity and educational inequality. Studying 25 different national contexts drawn from every inhabited continent on earth and building upon material from the earlier edition, the work analyses educational policies, practices and research on minority students, immigrants and refugees. The editors and contributors explore principal research traditions from countries as diverse as Argentina, China, Norway and South Africa, examining the factors promoting social cohesion as well as considerations regarding the use of international test score data. Seamlessly integrating findings of national reviews, the editors and contributors analyse how national contexts of race, ethnic relations shape the character and content of educational inequalities and deftly map out new directions for future research in the area. Global in its perspective and definitive in content, this one stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of education, sociology, race and ethnicity studies and social policy.
