M. Niss, 2013-04-17 The present book *Cases of Assessment in Mathematics Education* is one of two studies resulting from an ICMI Study Conference on Assessment in Mathematics Education and Its Effects. The book, which is published in the series of ICMI Studies under the general editorship of the President and Secretary of ICMI, is closely related to another study resulting from the same conference, *Investigations into Assessment in Mathematics Education* (Niss, 1992). The two books, although originating from the same sources and having the same editor, emphasize different aspects of assessment in mathematics education and can be read independently of one another. While the present book is devoted to presenting and discussing cases of assessment that are actually implemented, the other study attempts to critically analyze general and principal aspects of assessment. Naturally, the content of either book is enriched by the materials and perspectives provided by the other one. In order to put this book and its background into context, the nature and scope of the ICMI studies are outlined briefly below.

Metrics Vincanne Adams, 2016-03-05 This volume's contributors evaluate the accomplishments, limits, and consequences of using quantitative metrics in global health. Whether analyzing maternal mortality rates, the relationships between political goals and metrics data, or the links between health outcomes and a program's fiscal support, the contributors question the ability of metrics to solve global health problems. They capture a moment when global health scholars and practitioners must evaluate the potential effectiveness and pitfalls of different metrics, even as they remain elusive and problematic.

Contributors: Vincanne Adams, Susan Erikson, Molly Hales, Pierre Minn, Adeola Oni, Orisan Carolyn Smith, Morris Marlee Tichenor, Lily Walkover, Claire L. Wendland.

The Routledge International Handbook of Equity and Inclusion in Education Paul Downes, Guofang Li, Lore Van Praag, Stephen Lamb, 2024-05-13 Providing a cornerstone to the global debate on equity and inclusion within education, this handbook explores equity issues pertaining to poverty and social class, race, ethnicity, sociocultural, sociolinguistic exclusion in education, and recognises intersectionality and gender across these dimensions. This carefully curated collection of essays written by international experts promotes inclusive systems in education that explicitly recognise the voices of learners who may be at risk of marginalisation, exclusion, or underachievement. Developing a multilayered innovative conceptual framework involving spatial, emotional, relational, and dialogical turns for education, it emphasises key system points for reform, including building strategic bridges between health and education for vulnerable groups and shifts in focus for initial teacher education and the wider curriculum. The handbook is organised into the following key parts: Theoretical Frameworks, Funding Models and Structures for Equity and Inclusive Systems, Exclusion and Discrimination, Bridging Health and Education, Agency and Empowerment, Outreach and Engagement. *The Routledge International Handbook of Equity and Inclusion in Education* will be of great value to academics operating in the areas of education, psychology, sociology, social policy, ethnography, cultural studies, researchers in university research centres, and in policy institutes pertaining to education, poverty, social inclusion, as well as international organisations involved with inclusion in education.
