Non-Linear Perspectives on Teacher Development Kathryn J. Strom, Tammy Mills, Linda Abrams, 2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal *Professional Development in Education*

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD

has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country **Psychological Studies in the Teaching, Learning and**
