Extreme Pace Handicapping: If You Doodle They Will Come Randy Giles, 2008-06 The best payoffs I've had at the track were generated by extreme pace aberrations Those nice payoffs didn't come from pedestrians I'm talking about thieves and carpetbaggers opportunists who were ordinary but found themselves in extraordinary situations the right place the right time When I started playing the extreme pace way it made such a difference that I dedicated my handicapping life to it Extreme Pace Handicapping will show you what made the difference and why It's simple really I like to call it pace picture doodling If you doodle it they will come The Thief The Clever Thief The Loner and the Carpetbagger Includes one FREE month of the PACEAPPRAISER PPs Here's how Buy the book Go to the author's website see About the Author at the end of the book for website address Send a copy of your Amazon receipt along with your first and last name You will receive your login information by return email

Beyer on Speed Andrew Beyer, 2007 Written in Beyer's clean rapid fire prose this book explains how to relate speed figures to such factors as pace track bias and track conditions It discusses exotic wagers such as the pick six and reveals optimal uses of the figures based on computer analysis of more than 10 000 races Blending colorful anecdotes it presents a revolutionary way to play the horses

Prediction Markets Leighton Vaughan Williams, 2011-06-16 How does one effectively aggregate disparate pieces of information that are spread among many different individuals In other words how does one best access the wisdom of the crowd Prediction markets which are essentially speculative markets created for the purpose of aggregating information and making predictions offer the answer to this question The effective use of these markets has the potential not only to help forecast future events on a national and international level but also to assist companies for example in providing improved estimates of the potential market size for a new product idea or the launch date of new products and services The markets have already been used to forecast uncertain outcomes ranging from influenza to the spread of infectious diseases to the demand for hospital services to the box office success of movies climate change vote shares and election outcomes to the probability of meeting project deadlines The insights gained also have many potentially valuable applications for public policy more generally These markets offer substantial promise as a tool of information aggregation as well as forecasting whether alone or as a supplement to other mechanisms like opinion surveys group deliberations panels of experts and focus groups Moreover they can be applied at a macroeconomic and microeconomic level to yield information that is valuable for government and commercial policy makers and which can be used for a number of social purposes This volume of original readings contributed by many of the leading experts in the field
