Art history explores the history of art from prehistoric times to modern times. This discipline challenges one's creative side and motivates him or her to discover the aesthetic appeal of manmade forms. One of the historic masterpieces of world art is the sixteenth-century portrait of Mona Lisa done by the talented Italian artist, Leonardo da Vinci. The half-length portrait, set on a canvas of Poplar Wood, shows a woman seated whose identity is believed to be Lisa del Giocondo, the wife of a Florentine businessman.

The woman's smile, often described as enigmatic, is the most intriguing aspect of the painting and it is also the subject of much speculation. Although it was not signed or dated, the novel qualities of the painting have made it to be recognized as the most famous and mystifying work of art of all time.

It is believed that Leonardo started working on the portrait in 1503 or 1504 in Italy. Since it was his best painting, he went with it throughout his journeys, working and reworking it for almost four years and he kept it himself for some years after, finishing it just before he died in 1525 (Kartz, 2003). Years later, the King of France purchased it for 4,000 gold crowns, supposedly through the successors of Leonardo's assistant Salai.

It has received the world's attention since then. Following the French Revolution, Mona Lisa was taken to the Louvre. Napoleon had it transferred to the palace for adorning his bedroom and when he was banished from France, the painting yet again returned to the care of the Louvre. Historians believe that it was transferred from the Louvre to an undisclosed location somewhere in the country during the Franco-Prussian War (1870-71). Currently, the famous portrait is found in the Musée du Louvre in Paris, France.

Leonardo employed a pyramid design technique to position the seated female figure simply and peacefully in the space of the painting in which her folded hands represent the front corner of the pyramid. The woman's breast, neck, and face shine in the same light that shapes her hands, and Leonardo efficiently modified the pyramid design so as to create the visual impression of distance between Mona Lisa and the viewer.
