charged with stronger coordination of global efforts At the same time jurisdictions have re emphasized the need to get their own regulatory house in order before committing to further global harmonization And through banks failures and massive bail outs the financial sector hitherto a driving force behind the cross border integration of finance has been reconfigured This book asks a straightforward question what have these and other key post crisis trends in global finance done to the position that the European Union occupies in it The contributions to this book analyse the link between financial governance in the European Union and on the global level from diverse theoretical angles and they cover the main issues that will shape the future European role on the global regulatory stage This book was published as a special issue of the Journal of European Public Policy **Trademarks and Unfair Competition** J.
