Conformal Symmetry Breaking Differential Operators on Differential Forms Matthias Fischmann, Andreas Juhl, Petr Somberg, 2021-06-18 We study conformal symmetry breaking differential operators which map differential forms on  $\mathbb{R}^n$  to differential forms on a codimension one subspace  $\mathbb{R}^{n-1}$ . These operators are equivariant with respect to the conformal Lie algebra of the subspace  $\mathbb{R}^{n-1}$ . They correspond to homomorphisms of generalized Verma modules for  $\mathfrak{so}(n, 1)$  into generalized Verma modules for  $\mathfrak{so}(n-1, 1)$  both being induced from fundamental form representations of a parabolic subalgebra. We apply the F-method to derive explicit formulas for such homomorphisms. In particular we find explicit formulas for the generators of the intertwining operators of the related branching problems restricting generalized Verma modules for  $\mathfrak{so}(n, 1)$  to  $\mathfrak{so}(n-1, 1)$ . As consequences we derive closed formulas for all conformal symmetry breaking differential operators in terms of the first order operators  $d$  and  $\bar{d}$  and certain hypergeometric polynomials. A dominant role in these studies is played by two infinite sequences of symmetry breaking differential operators which depend on a complex parameter. Their values at special values of  $\lambda$  appear as factors in two systems of factorization identities which involve the Branson-Gover operators of the Euclidean metrics on  $\mathbb{R}^n$  and  $\mathbb{R}^{n-1}$  and the operators  $d$  and  $\bar{d}$  as factors respectively. Moreover they naturally recover the gauge companion and  $Q$ -curvature operators of the Euclidean metric on the subspace  $\mathbb{R}^{n-1}$  respectively. **Mathematical**

Studies in Intelligence, 2016 *Thinking and Acting Systemically* Alan Daly, Kara Finnigan, 2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts. Policies that focus on skill development, recognize and support performance, create opportunities for collaboration, build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change. **Disorder and the Disinformation Society** Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information

disruption and software failure within contemporary Western society Through an investigation of informationalism defined as a contemporary form of capitalism it describes the social processes producing informational disorder While most social theory sees disorder as secondary pathological or uninteresting this book takes disordering processes as central to social life The book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements *Yearbook of International Organizations 2013-2014 (Volume 3)*
