Maths Books For Ecet:

Characteristics of Effective Early Learning 2e Helen Moylett, 2022-02-23 This new and updated edition of *Characteristics of Effective Early Learning* focuses on how children learn which is just as important as what they learn. The book helps practitioners understand their key role in supporting children's self-regulation skills and learning power through playing and exploring, active learning and thinking creatively and critically. It includes new chapters on affirmative parenting practices and the crucial role of adult communication partners in supporting children's learning. The book explains how emotional and cognitive self-regulation in the early years underpins lifelong learning. Investigates how children engage in learning through playing and exploring and are motivated through active learning. Explores how children become creative and critical thinkers, excited by their own learning power and able to review their own learning and thinking. Outlines how to approach observation, assessment and planning appropriately. Suggests how to continue the characteristics of effective learning into work with older children and staff teams. Written by leaders in the field based on research and rich in practical examples and case studies, this is an essential read for early years students and practitioners. The book will support those who want to find out more about how to encourage children in becoming self-regulated, playful, active learners who think deeply and creatively about their own learning and the world around them. Whatever kind of early years setting you work in, this book is sure to inform, inspire and enthuse you and your staff. Sue Cowley, Early Years Teacher, Author, Presenter and Trainer. The publication provides academic evidence, practical guidance and support for undergraduates and the general reader. Michael Freeston, Director of Quality Improvement, Early Years Alliance. How to Recognise and Support Mathematical Mastery in Young Children's Play Di Chilvers, 2021-07-12 This book explains how young children develop mathematically in their earliest years and shows the support and teaching needed by adults to accelerate their progress and attainment, helping them master mathematical concepts and skills. The practical guidance has been carefully developed over a number of years and is based on research undertaken with primary schools in Sheffield as part of the Talk for Maths Mastery initiative. It recognises that children's mathematical development is embedded within child-led play and connected to deeper levels of thinking and wider dispositions for learning. Maths is happening everywhere at any moment; we just need to keep an open mind, open eyes and listen. Including case studies, links to practice and reflective questions, the chapters reveal what mastery orientation looks like from the children's perspective in their learning and covers children's serve and return conversational talk, mathematical
