*Reinventing STEM in Early Childhood Education* Eugene Geist, 2025-05-09 Teaching STEM to young children is about more than helping them learn their numbers and facts. It is an important and complex process that to be effective should honor the way children's brains are developing. This book outlines how early childhood educators can best support young children's STEM journeys as children naturally take in information about their environment, synthesize it, and grow in the process. This comprehensive text details different theories of learning, research on how young brains develop, practical information on preparing your environment and yourself for teaching STEM to children, guidance for supporting diverse populations of students, and developmental guidelines, sample standards, resources, and lesson plans. Organized chronologically, the book connects relevant STEM topics with each developmental age range and outlines common school standards for each grade. *Reinventing STEM in Early Childhood Education* is meant to be a core text for preservice teachers in math and science methods courses and is also important reading for teacher educators and professional development programs.

**Advancing Knowledge and Building Capacity for Early Childhood Research** Sharon Ryan, M. Elizabeth Graue, Vivian L. Gadsden, Felice J. Levine, 2021-01-20 This volume employs a multidisciplinary approach to research on a high profile topic very much on the agenda of state and national policy leaders: early childhood development and education. It aims to reflect how scholarly perspectives shape the contours of knowledge generation and to illuminate the gaps that prevent productive interchange among scholars who value equity in the opportunities available to young children, their families, and teachers/caregivers. The editors and authors identify and prioritize critical research areas, assess the state of the field in terms of promising research designs and methodologies, and identify capacity building needs and potential cross-group collaborations.

**Academic Languageing** Gisela Ernst-Slavits, Margo Gottlieb, 2025-06-20 Rethink how academic languageing can transform content area teaching.
