Maths Literacy Grade 10 June Exam 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Leading Change in Your School Douglas B. Reeves, 2009-04-14
Guiding schools through significant change is one of the toughest challenges educational leaders face but learning from the examples of those who have succeeded can make it less daunting. In *Leading Change in Your School*, distinguished author and researcher Douglas B. Reeves offers lessons learned through his work with educators in thousands of schools around the world and presents real life examples of leaders who have met the challenge of change head on with impressive results for their schools and districts. Readers will also find practical resources for engaging their colleagues in change initiatives. Expanding on a number of his columns in the journal *Educational Leadership*, Reeves offers insights and recommendations in four areas: Creating conditions for change including assessments to determine personal and organizational readiness for change; Planning change including cautionary notes about strategic planning; Implementing change including the importance of moving from rhetoric to day to day reality; and Sustaining change including the need to reorient priorities and values so that individual convenience gives way to a shared sense of the greater good. The change leaders both teachers and administrators whose stories Reeves tells come from varied districts but they share a passion for creating schools that work for all students. They are, Reeves says, people like you sharing similar challenges but perhaps with different results.

The Pedagogy of Standardized Testing Arlo Kempf, 2016-04-29
Based on a large scale international study of teachers in Los Angeles, Chicago, Ontario and New York, this book illustrates the ways increased use of high stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult and class time spent on testing consumes scarce time and attention needed to support the success of all students, further disadvantaging ELLs, students with exceptionalities, low income and racially minoritized students.
