study workbook is designed to reinforce all aspects of children's school work. The exercises have been written in line with the National Curriculum requirements for maths incorporating the latest developments in the implementation of the National Numeracy Strategy. Gold stickers are provided as a reward for the child to put on each completed page. A fold out fill in achievement chart makes it easy for children to see their progress and there is a certificate to award on completion of each book. A pull out answer section with parents' notes provides hints and tips and describes how the scheme links with the National Curriculum in the UK and the general curriculum order in the US and Australia.

**El-Hi Textbooks and Serials in Print**, 2006     *ENC Focus*, 1999     **Making Sense of Social Studies** David Jenness, 1990 EDUCATION     **Math** Charles I. Randall, 1998     **Assessing Math Concepts** Kathy Richardson, 2003. Assessing math concepts is a continuum of assessments that focus on important core concepts and related critical learning phases that must be in place for children to understand and be successful in mathematics. This series is based on the premise that teachers can provide more effective instruction when they are aware of the essential steps that children move through in developing an understanding of foundational mathematical ideas. The assessment tools presented here provide teachers with the information they need to determine precisely what children need to learn. Students progress confidently when teachers are able to provide appropriately challenging learning experiences. Back cover     *El-Hi Textbooks & Serials in Print*, 2005, 2005
