Modern Landscape Architecture Critical Review:

Modern Landscape Architecture Marc Treib, 1992 *Theory in Landscape Architecture* Simon R. Swaffield, 2002-11-22
Basic theoretical texts for landscape architects **Inventing the Charles River** Karl Haglund, 2002-11-22 An illustrated account of the creation of the Charles River Basin focusing on the precarious balance between transportation planning and the stewardship of the public realm The Charles River Basin extending nine miles upstream from the harbor has been called Boston's Central Park Yet few realize that this apparently natural landscape is a totally fabricated public space Two hundred years ago the Charles was a tidal river edged by hundreds of acres of salt marshes and mudflats Inventing the Charles River describes how before the creation of the basin could begin the river first had to be imagined as a single public space The new esplanades along the river changed the way Bostonians perceived their city and the basin with its expansive views of Boston and Cambridge became an iconic image of the metropolis The book focuses on the precarious balance between transportation planning and stewardship of the public realm Long before the esplanades were realized great swaths of the river were given over to industrial enterprises and transportation millponds bridges landfills and a complex network of road and railway bridges In 1929 Boston's first major highway controversy erupted when a four lane road was proposed as part of a new esplanade At twenty year intervals three riverfront road disputes followed successively more complex and disputatious culminating in the lawsuits over Scheme Z the Big Dig's plan for eighteen lanes of highway ramps and bridges over the river More than four hundred photographs maps and drawings illustrate past and future visions for the Charles and document the river's place in Boston's history Daniel Urban Kiley William S. Saunders, Anita Berrizbeitia, Dan Kiley, 1999 Generally considered to be America's foremost postwar landscape architect Daniel Urban Kiley's earlier work is not well known This book focuses on several of his more creative projects from the 1940s and 1950s including more elaborate alternate plans

The Modern Landscapes of Ted Smyth Rod Barnett, Jacqueline Margetts, 2017-01-06 The modern period in landscape architecture is enjoying the fascinated appreciation of scholars and historians in Europe and the Americas and new themes new subjects and new appraisals are appearing This book contributes to the conversation by focusing on the work of a singular designer who spent his entire career in a province of the North Island of New Zealand Ted Smyth practiced an assured landscape modernism without ever seeing the designs of his forebears or his contemporaries working in the UK Europe and the United States Designing in isolation from the mainstream of modernism and a little after its high tide Smyth produced a series of gardens that provoke a revaluation of the diffusionist model of influence The book explains and describes the evolution of Smyth's design vocabulary and relates it to the development of tropical landscape modernism in other Asia Pacific sites It shows how a culture of garden modernism can be generated from within a particular locale and highlights Smyth's engagement with Mori design traditions in search of a specific expression of the high modern essentialism of place **Critiques of Built Works of Landscape Architecture**, 2002 *Meaning in Landscape*

Architecture and Gardens Marc Treib, 2011-03-01 While we all live our lives in designed landscapes of various types only on occasion do we consider what these landscapes mean to us and how they have acquired that significance Can a landscape architect or garden designer really imbue new settings with meaning or does meaning evolve over time created by those who perceive and use these landscapes What role does the selection and arrangement of plants and hard materials play in this process and just where does the passage of time enter into the equation These questions collectively provide the core material for *Meaning in Landscape Architecture and Gardens* a compendium of four landmark essays written over a period of twenty years by leading scholars in the field of landscape architecture New commentaries by the authors accompany each of the essays and reflect on the thinking behind them as well as the evolution of the author's thoughts since their original publication Although the central theme of these writings is landscape architecture broadly taken the principal subject of several essays and commentaries is the garden a subject historically plentiful in allusions and metaphors As a whole *Meaning in Landscape Architecture and Gardens* offers the general reader as well as the professional a rich source of ideas about the designed landscape and the ways by which we perceive consider react and dwell within them and what they mean to us The essays have been perennial favorites in landscape courses since their original publication in *Landscape Journal* Bringing them together bolstered by the new commentaries creates a book valuable to all those creating gardens and landscapes as well as those teaching and studying these subjects

Garrett Eckbo Marc Treib, Dorothee Imbert, 1997 The man and his work are given an appreciative investigation in *Garrett Eckbo Modern Landscapes for Living* a detailed and elegant study that features more than sixty of his projects many published here for the first time Marc Treib examines the aesthetic formation of Eckbo's manner and by implication the broader field of landscape architecture since the 1930s Dorothee Imbert writes of Eckbo's social vision noting his belief that ultimately landscape design is the arrangement of environments for people The book includes an afterword by Garrett Eckbo a memoir by photographer Julius Shulman a biographical and professional chronology and a bibliography of publications by and about the landscape architect and his contemporaries

The American Lawn Georges Teyssot, 1999 The site of political demonstrations sporting events and barbecues and the object of loving if not obsessive care and attention the lawn is also symbolically tied to our notions of community and civic responsibility serving in the process as one of the foundations of democracy
