Foreign Relations Library

Moi Uni 2015 16 Fee Structures:

Underutilised Crop Genomes Mark A. Chapman, 2022-11-03 This book highlights the uses for underutilized crops presenting the state of the art in terms of genome sequencing for over 30 crops previously understudied and under researched In a changing climate and with significant pressure on the land it is the ideal time to be discussing novel crops with significant biotic and abiotic tolerances and or rich nutrient profiles for consumers Previously the only species with sequenced genomes were high profile internationally recognized crops but in the current era genomes are being sequenced for dozens of crops including those previously classified as underutilized now being investigated This book covers food crops from fruits to tubers and from grasses to legumes as well as crops with non food applications Some of these crops have draft genomes and others have polished genomes with extensive resequencing panels Each chapter tells the story of an individual crop or crop group written by experts focusing on the genome data available revealing more about crop domestication and genetic variation and the current and future prospects given that this data is now becoming available It also highlights how even small sequencing projects can provide draft genome sequences suitable for gene discovery comparative genomics and identification of molecular markers for understanding these crops further

Afrotropical Streams and Rivers Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent
