Edge Paul R. Pillar,2023-11-28 Intense partisanship is a familiar part of the contemporary United States but its consequences do not stop at the country's borders The damage now extends to U S relations with the rest of the world Too often political leaders place their own party's interest in gaining and keeping power ahead of the national interest Paul R Pillar examines how and why partisanship has undermined U S foreign policy especially over the past three decades Placing present day discord in historical perspective going back to the beginning of the republic Beyond the Water's Edge shows that although the corrupting effects of partisan divisions are not new past leaders were often able to overcome them Recent social and political trends and developments including the end of the Cold War however have contributed to a surge of corrosive partisanship Pillar demonstrates that its costs range from the prolongation of war and crisis to the intrusion of foreign influence and the undermining of democracy He explores the ways other governments respond to inconsistency in U S foreign policy the consequences of domestic division for U S global leadership and how the corruption of American democracy also weakens democracy worldwide Pillar considers possible remedies but draws the sobering conclusion that entrenched political sectarianism makes their adoption unlikely Offering insightful analysis of the decline of U S foreign

relations Beyond the Water's Edge is an important book for all readers concerned about the state of the American political system Quality Education and International Partnership for Textile and Fashion Xinfeng Yan, Lihong Chen, Hafeezullah Memon, 2023-07-02 This book mainly focuses on SDG4 Quality Education and aims to understand the past present and future of textile fashion apparel and related study majors of East African countries Professors and field experts in textile engineering of selected countries describe the potential and prospects of textile education and how it can lead to internationalization in the various chapters It also discusses the textile university alliance and the potential for international education related to textiles in the developing region With updated illustrations images data graphs and tables this book serves as a reference book for universities with textile engineering major in countries throughout the world
