Kzn Economics Paper 2 Trial 2014:

Youth Employment Programmes in Africa Ramos E. Mabugu, Lucas Ronconi, 2025-10-03 This book investigates youth employment programmes across nine African countries providing important insights into the world's youngest continent by population in which 60% of people are aged under 25. By 2050 the labour force in sub-Saharan Africa is expected to be almost double the size of the labour force in high income countries representing a massive shift in the world's working population and providing a significant challenge for job creation. In this book contributors bring together insights from more than 500 in depth interviews and 1 500 focus group participants to consider whether youth employment programmes are effectively reaching vulnerable groups. This book tackles the problem of political clientelism in the allocation of benefits and considers the level of coordination that is taking place across programmes and political institutions. Combining rich empirical findings with data about labour market outcomes and institutions this book will be an important read for researchers wishing to understand the political economy of youth employment policy in Africa.

Achieving a nutrition revolution for Africa Hendriks, Sheryl L., 2016-10-17 Focusing the 2015 Annual Trends and Outlook Report ATOR on nutrition will contribute to a broader understanding of the critical role of nutrition in achieving international continental and national economic growth targets through agriculture food security and nutrition. This report presents information and analysis in support of evidence based policy making that should inform the second generation of CAADP national investment plans now being developed. This is an important moment for shaping the region's future and ensuring that the much needed agriculture led growth and development agenda can simultaneously deliver on improving nutrition saving lives improving productivity and health and curbing nutrition related diseases and the associated public health expenditures. These investment plans should address not only the usual elements of undernutrition but also widespread micronutrient deficiencies termed hidden hunger and the growing problem of overweight and obesity that is associated with economic growth.

Prioritizing Development Bjorn Lomborg, 2018-06-07 This book is a unique guide to making the world a better place. Experts apply a critical eye to the United Nations Sustainable Development agenda also known as the Global Goals which will affect the flow of 2.5 trillion of development aid up until 2030. Renowned economists led by Bjorn Lomborg determine what pursuing different targets will cost and achieve in social environmental and economic benefits. There are 169 targets covering every area of international development from health to education sanitation to conflict. Together these analyses make the case for prioritizing the most effective development investments. A panel of Nobel Laureate economists identify a set of 19 phenomenal development targets and argue that this would achieve as much as quadrupling the global aid budget.

Global Visions of Violence Jason Bruner, David C. Kirkpatrick, 2022-12-09 In *Global Visions of Violence* the editors and contributors argue that violence creates a lens bridge and method for interdisciplinary collaboration that examines Christianity worldwide in the twentieth and twenty first centuries. By analyzing the myriad ways violence persecution and suffering impact Christians and the

imagination of Christian identity globally this interdisciplinary volume integrates the perspectives of ethicists historians anthropologists and ethnographers to generate new conversations Taken together the chapters in this book challenge scholarship on Christian growth that has not accounted for violence while analyzing persecution narratives that can wield data toward partisan ends This allows Global Visions of Violence to push urgent conversations forward giving voice to projects that illuminate wide and often hidden landscapes that have been shaped by global visions of violence and seeking solutions that end violence and turn toward the pursuit of justice peace and human rights among suffering Christians The Trauma of Racism Alisha Moreland-Capuia, 2021-05-31 This book provides in depth analysis of the historical philosophical anthropological political and neurobiological reinforcements of fear and the role of fear on fear interactions in the construction and maintenance of systems This text will help systems appreciate the profound pervasive and deleterious role fear has played in the establishment of laws policies and practices and explore what systems can do to reduce fear and prioritize safety and healing Right now we are dealing with hard truths human suffering runs deep and is universal trauma is ubiquitous and widespread racism is real and has profound psychological physical political social and economic implications and the world is hurting and needs healing Many are curious about where and when healing will commence who will facilitate it and what it will look and feel like Healing comes in this order safety truth and then reconciliation When we know better we can or should certainly do better This book offers a framework for how to effectively begin to deconstruct systemic fear prioritize safety reduce needless suffering and move toward optimal healing and sustained change
