Spreadsheet Problem Solving and Programming for Engineers and Scientists David E. Clough, Steven C.

Chapra, 2023-10-19 Spreadsheet Problem Solving and Programming for Engineers and Scientists provides a comprehensive resource essential to a full understanding of modern spreadsheet skills needed for engineering and scientific computations. Beginning with the basics of spreadsheets and programming, this book builds on the authors' decades of experience teaching spreadsheets and programming to both university students and professional engineers and scientists. Following on from this, it covers engineering economics, key numerical methods, and applied statistics. Finally, this book details the Visual Basic for Applications (VBA) programming system that accompanies Excel. With each chapter including examples and a set of exercises, this book is an ideal companion for all engineering courses and also for self-study. Based on the latest version of Excel, Microsoft Excel for Microsoft 365, it is also compatible with earlier versions of Excel dating back to Version 2013. Including numerous case studies, this book will be of interest to students and professionals working in all areas of engineering and science.

An Introduction to Statistical Problem Solving in Geography J. Chapman McGrew, Jr., Charles B.

Monroe, 2009-04-22 Written for undergraduate geography majors and entry-level graduate students with limited backgrounds in statistical analysis and methods, McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem-solving framework. Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text. Without compromising statistical rigor or oversimplifying, the authors stress the importance of written narratives that explain each statistical technique. After introducing basic statistical concepts and terminology, the authors focus on nonspatial and spatial descriptive statistics. They transition to inferential problem solving, including probability sampling and estimation, before delving deeper into inferential statistics for geographic problem solving. The final chapters examine the related techniques of correlation and regression. A list of major goals and objectives is included at the end of each chapter, allowing students to monitor their own progress and mastery of geographic statistical materials. An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation.

Social and Emotional Learning in Action

Tara Flippo, 2016-05-08 Social and Emotional Learning in Action (SELA) is an easy-to-use sourcebook facilitated by teaching and/or counseling practitioners primarily in school settings. The pedagogical basis for these lessons is shaped around the research findings of the Collaborative for Academic Social and Emotional Learning (CASEL), indicating that the inclusion of social and emotional development programs positively affects academic achievement. CASEL has identified five interrelated cognitive, affective, and behavioral competencies: self-awareness, self-management, social awareness, relationship skills, and responsible decision-making. SELA will address all five. SELA will provide a developmentally sequenced, year-long modular flow or stand-alone lessons that integrate the benefits of experiential and social-emotional learning (SEL) into the classroom.
