Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials

Political Pressures on Educational

and Social Research Karen Trimmer, 2016-05-12 Political Pressures on Educational and Social Research draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy. Chapters explore the impacts this can have on the researchers as well as the influence it has on the research including the methodology and the publication of results. The book offers innovative ways of seeing how these connect, overlap and interact, revealing particular issues of concern for researchers and evaluators in the context of research internationally. Key topics include the power and positioning of research, evidence-based policy development, ethics and the importance of research that seeks to explore and discover knowledge. The book is divided into two sections. The first presents chapters from international academics which provide a theoretical underpinning and discussion of power, policy, ethics and their influence on research, resourcing, autonomy, purpose and methodology. The second section explores specific case studies and instances from the authors' own experiences in the field. This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers, evaluators and postgraduate students in the fields of education and the social sciences. It will be of particular interest to those studying research methods.

Trust-Based Observations Craig Randall, 2020-07-30 The results in observations are not improving teaching and learning. Pertinently, the Gates Foundation's recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement. The way observations are currently designed serve as an obstacle to teacher risk taking. Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built. Trust-Based Observations: Maximizing Teaching and Learning Growth is a schema-changing evaluation model that understands people perform at their best when they feel safe and supported. It begins with twelve 20-minute observations per week followed by collegial conversations driven by reflective questions, sharing observed teaching strengths and the building of safe and trusting relationships with teachers. Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers' trust. When teachers fully embrace risk taking and innovation, it leads to remarkable teaching transformations and improved student learning.

Teaching to Change the World Jeannie Oakes, Martin Lipton, Lauren Anderson, Jamy Stillman, 2018-01-29 Teaching to Change the World is an up-to-the-moment engaging social justice-oriented introduction to education and teaching and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-

changing educational landscape for those teachers who see the potential for education to change the world Features and Updates of the New Edition Fully updated Chapter 1 The U S Schooling Dilemma reflects our current state of education after the 2016 U S presidential election First person observations from teachers including first year teachers continue to offer vivid authentic pictures of what teaching to change the world means and involves Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers and charter schools Attention to diversity and inclusion is treated as integral to all chapters woven throughout rather than tacked on as separate units Digging Deeper resources on the new companion website include concrete resources that current and future teachers can use in their classrooms Tools for Critique provides instructors and students questions prompts and activities aimed at encouraging classroom discussion and particularly engaging those students least familiar with the central tenets of social justice education
