Life Science Memo Grade 10 November 2013

Jon Gertner

Life Science Memo Grade 10 November 2013:

Health Inequality Mel Bartley, Michelle Kelly-Irving, 2024-11-06 The persistence of stark health inequalities in today's world is painfully clear to see not least in the effects of the Covid 19 pandemic and falling life expectancy in many parts of the world. How can we advance our understanding of the full extent of health inequality, what drives it and ways to address it? The third edition of this popular book closely examines the influence of social class, gender and race/ethnicity among other issues on health in the light of broad macro-political contexts. The classic behavioural, psychosocial and material approaches to health and their embodiment within a life course perspective are introduced but importantly are also re-situated within the growing understanding of the commercial and political determinants of health. Bartley and Kelly-Irving draw on extensive new evidence that shows how the chances for everyone to lead a long and healthy life depend on where power lies to control health-damaging policies and introduce health-promoting ones. **Health Inequality** will continue to be essential reading for students taking courses in the sociology of health and illness, social policy and welfare, health sciences, public health and epidemiology and all those interested in understanding the consequences of social inequality for health. **Debating**

Modern Medical Technologies Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions: Are they safe and effective? Are they worth the cost? When should they be allowed on the market and when should Medicare, Medicaid and private insurance companies be required to pay for drugs, devices and diagnostic tests? Using case studies of disputes about the value of mammography, screening, genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell-based therapies and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians and patient advocates. **Debating Modern Medical Technologies: The Politics of Safety, Effectiveness and Patient Access** reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine and technology assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients. **The Idea Factory** Jon Gertner, 2013-02-26 The definitive history of America's greatest

incubator of innovation and the birthplace of some of the 20th century's most influential technologies. Filled with colorful characters and inspiring lessons, **The Idea Factory** explores one of the most critical issues of our time: What causes innovation? Walter Isaacson, *The New York Times Book Review*: Compelling. Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources. *The Wall Street Journal*: From its beginnings in the

1920s until its demise in the 1980s Bell Labs officially the research and development wing of AT T was the biggest and arguably the best laboratory for new ideas in the world From the transistor to the laser from digital communications to cellular telephony it s hard to find an aspect of modern life that hasn t been touched by Bell Labs In *The Idea Factory* Jon Gertner traces the origins of some of the twentieth century s most important inventions and delivers a riveting and heretofore untold chapter of American history At its heart this is a story about the life and work of a small group of brilliant and eccentric men Mervin Kelly Bill Shockley Claude Shannon John Pierce and Bill Baker who spent their careers at Bell Labs Today when the drive to invent has become a mantra Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation Here after all was where the foundational ideas on the management of innovation were born
