Conclusions

The choice of optimal level of transparency will still be the subject of theoretical and empirical research in the future. In the meantime, a number of practical measures can be taken to improve the quality of the information provided by the companies in the world.

First, companies should be encouraged to voluntarily disclose more information. This can be done by providing incentives, such as awards, or by imposing penalties, such as fines, on companies that do not disclose information.

Second, companies should be encouraged to improve the quality of the information they provide. This can be done by providing guidelines, such as the Global Reporting Initiative (GRI) standards, or by imposing requirements, such as the Sarbanes-Oxley Act.

Third, companies should be encouraged to improve the reliability of the information they provide. This can be done by providing certification, such as the ISO 26000 standard, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.

Fourth, companies should be encouraged to improve the accessibility of the information they provide. This can be done by providing the information in a format that is easy to access, such as a website, or by providing the information in a language that is understandable to a wide range of stakeholders.

Fifth, companies should be encouraged to improve the timeliness of the information they provide. This can be done by providing the information on a regular basis, such as quarterly, or by providing the information in a timely manner, such as in response to a request.

Sixth, companies should be encouraged to improve the consistency of the information they provide. This can be done by providing the information in a standard format, such as the GRI standards, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.

Seventh, companies should be encouraged to improve the comparability of the information they provide. This can be done by providing the information in a format that is comparable to the information provided by other companies, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.

Eighth, companies should be encouraged to improve the credibility of the information they provide. This can be done by providing the information from a reputable source, such as a third-party auditor, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.

Ninth, companies should be encouraged to improve the relevance of the information they provide. This can be done by providing the information that is relevant to the needs of the stakeholders, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.

Tenth, companies should be encouraged to improve the transparency of the information they provide. This can be done by providing the information in a format that is transparent, such as a website, or by imposing requirements, such as the EU Directive on Non-Financial Reporting.
