

Biology STAAR Review Foldable

Reasons we love it:

- Covers all major topics from the 5 STAAR Biology categories
- Includes STAAR question blueprint, interim STAAR data analysis section, and test "pep talk" section for individualized student interaction with materials
- Includes corresponding Google Slides allows absent students to have the same access to the information without making extra work for the teacher
- Corresponding Google Slides contain recent examples of each category topic from released STAAR Biology tests for student practice & familiarity

Students and the teacher can review all 5 reporting categories of the Biology STAAR test in a concise foldable format. This takes as few as 6 class periods (one per category and one to interpret interim data/ write a pep talk), but it can be extended as needed by the teacher.

Package includes:

- Student foldable (blank)
- Teacher key (filled in)
- Google Slides that correspond to each section of the foldable that walk students through review/fill in
- Links within Google Slides to Outlet vocabulary sets for each category as well as overall vocabulary review
- Links within Google Slides to Blocket sets for each category as well as overall review

Measuring Up Staar Biology Teacher:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
