Essential Mechanics - Statics and Strength of Materials with MATLAB and Octave P. Venkataraman, 2020-01-07 Essential Mechanics Statics and Strength of Materials with MATLAB and Octave combines two core engineering science courses Statics and Strength of Materials in mechanical civil and aerospace engineering It weaves together various essential topics from Statics and Strength of Materials to allow discussing structural design from the very beginning The traditional content of these courses are reordered to make it convenient to cover rigid body equilibrium and extend it to deformable body mechanics The e book covers the most useful topics from both courses with computational support through MATLAB Octave The traditional approach for engineering content is emphasized and is rigorously supported through graphics and analysis Prior knowledge of MATLAB is not necessary Instructions for its use in context is provided and explained It takes advantage of the numerical symbolic and graphical capability of MATLAB for effective problem solving This computational ability provides a natural procedure for What if exploration that is important for design The book also

emphasizes graphics to understand learn and explore design The idea for this book the organization and the flow of content is original and new The integration of computation and the marriage of analytical and computational skills is a new valuable experience provided by this e book Most importantly the book is very interactive with respect to the code as it appears along with the analysis

Photonic Microsystems Olav Solgaard,2009-04-05 This book describes Microelectromechanical systems MEMS technology and demonstrates how MEMS allow miniaturization parallel fabrication and efficient packaging of optics as well as integration of optics and electronics The book shows how the characteristics of MEMS enable practical implementations of a variety of applications including projection displays fiber switches interferometers and spectrometers The authors conclude with an up to date discussion of the need for the combination of MEMS and Photonic crystals
