This remarkable new resource will help students become active problem solvers who see mathematics as a meaningful tool that can be used outside the classroom. Hope Martin applies more than 40 years of teaching experience to developing a myriad of high interest, meaningful math investigations. This project based resource encourages cooperative, interactive learning experiences that not only help students make connections between various math skills but also make important connections to the real world. Aligned to NCTM standards, these mathematical applications are broken down into complete units focusing on different topics. Each chapter includes Background information on the topic, Step by step procedures for math investigations, Assessment strategies, Journal questions, Reproducible worksheets, Additional related readings, and Internet Web sites. By increasing their awareness of meaningful everyday applications, students will learn to use math as an essential tool in their daily lives.
