

**1. Answer: C**

**Explanation:** To transform a ratio into its fractional form, we just write the first number of the ratio as the numerator, then the second number as the denominator.

Thus,  $5 : 6$  is  $\frac{5}{6}$  in fractional form.

**2. Answer: B**

**Explanation:** The problem is asking us to determine the ratio of hens to the total number of chickens. This problem is an example of a "part to a whole" ratio.

The total number of chickens is the sum of the number of roosters and number of hens:  $15 + 18 = 33$

Meanwhile, there are 15 hens.

Therefore, the ratio of hens to the total number of chickens is  $15 : 33$ .

**3. Answer: B**

**Explanation:** To find the value of  $N$  in  $8 : N = 16 : 50$ , we just apply the rule that in a proportion, the product of the means is equal to the product of the extremes .

Product of the means:  $N \times 16$

Product of the extremes:  $50 \times 8 = 400$

Since the product of the means is equal to the product of the extremes:

$$N \times 16 = 400$$

What must be multiplied to 16 so that we obtain 400? That number is 25 ( $400 \div 16$ )

Hence, the answer is 25.

**4. Answer: C**

**Explanation:** We will just use the same method we used in Item 3 to solve for  $A$  in  $A : 13 = 3 : 39$
