

Envisions Mathematics 5th Grade Lesson Plan
Topic 8: Apply Understanding of Multiplication to Multiply Fractions
Lesson 8-1: Multiply a Fraction by a Whole Number
Essential Question: What are some ways to multiply a fraction by a whole number?
Objective: Students will be able to multiply fraction by a whole number
Look Back and This Lesson: In grade 4, you multiplied a fraction by a whole number using the understanding that a fraction a/b is a multiple of $1/b$, so $a/b = a \times 1/b$. And less than 4-3, we used models to show the product of a whole number and a decimal with repeated addition. Today we will show the product of a fraction and a whole number similarly and use the associative property to multiply a fraction and a whole number without models.
CCSS.MATH.CONTENT.
3.NF.A.1 Understand a fraction $1/b$ as the quantity formed by 1 part where the whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size $1/b$.
3.NF.A.2 Understand a fraction as a number on the number line; represent fractions on a number line diagram.
Vocabulary
Solve and Share
<ul style="list-style-type: none"> To introduce the skill, at the whole class, engage in workbook page 93 Have students read the problems and draw a picture or use any model to help you solve Remind students to model with math by thinking about different ways you can model multiplication problems Have students explain how they solved
Visual Learning Bridge
Each student will say out loud and 'think' out loud the steps being taken to solve the problem.
<ul style="list-style-type: none"> Teacher reads problem aloud Teacher models using the examples provided, while thinking aloud and explaining how I can multiply a fraction by a whole number. One way you can do this is using repeated addition and another way you can do this is using the associative property
Practice Me!
Have students find $10 \times 3/5$ and use repeated addition to check their answer. Show your work.
Guided Practice
<ul style="list-style-type: none"> Have students in 5 groups Have students solve problems 4 by multiplying a fraction by a whole number Have students explain how they solved
Independent Practice
<ul style="list-style-type: none"> Students work independently to multiply a fraction by a whole number
Differentiation:
Intervention
<ol style="list-style-type: none"> Use Visual Models – Provide fraction strips or bar models to show repeated addition of fractions (e.g., $3 \times 1/4$ is the same as $1/4 + 1/4 + 1/4$). Sentence Frames for Explanation – Support students in explaining their thinking using frames like "I multiplied the numerator because..." or "I added the fraction ___ times." Draw to Solve – Encourage students to draw simple rectangles or circles divided into fractional parts and shade the repeated part to show multiplication. Intervention Activity in Workbook: 'Multiply Fractions by Whole Numbers'
Enrichment
<ol style="list-style-type: none"> Challenge Problems with Improper Fractions – Give students whole number \times fraction problems that result in improper fractions and ask them to convert to mixed numbers. Fraction Puzzle Creation – Students create multiplication-of-fraction problems and only give the answer. Classmates must figure out the original expression. Compare Expressions – Students compare two multiplication expressions involving fractions and explain which product is greater and why.
