

Vertebrates and Invertebrates

Objectives:

Students will gain an understanding of the differences between vertebrates and invertebrates.

Materials:

Crayons	Shrimp
Fish	Plaster
2 poster boards	Clay
Magnifying	Decussate

Activity:

Introduce

- Discuss the two new names - vertebrates and invertebrates. Have the students look their new backbones and write either a backbone. Ask students for examples of animals they think would fit into each group.

Develop

- Lay out the crayon, shrimp, and fish. Have the students guess whether these animals will be vertebrates or invertebrates. Fold over side of the fish so that the backbone is exposed. Peel and cut open the shrimp. Have students look each animal and tell you if they find a backbone or not. Does the fish's backbone look like their own? What is the same place on their backbones?

Classify

- Have the students make two poster collages, one for vertebrates and the other for invertebrates. They can be made from pictures the students have drawn the pictures or pictures collected from magazines. Pictures gathering can be an assignment turned out at home with the help of parents.

Evaluate

- Informal teacher observation. Did the students appear to grasp the new concept? Were the pictures collected representative of vertebrates and invertebrates?
