Spacecraft Propulsion Systems and Integration Paul A. Czysz, Claudio Bruno, Bernd Chudoba, 2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike **Guide to Programming for the Digital Humanities** Brian Kokensparger, 2018-08-23 As an introduction to programming for the Digital Humanities DH this book presents six key assignments oriented on DH topics The topics include Computing Change Over Time calculating burials at a historic cemetery Visualizing Change Over Time visualizing the burials at the historic cemetery Textual Analysis finding word frequencies and stop words in public domain texts XML Transformation transforming a simplified version of XML into HTML styled with CSS Stylometry comparing the measured features of graphic images and Social Network Analysis analyzing extended relationships in historic circles The book focuses on the practical application of these assignments in the classroom providing a range of variations for each assignment which can be selected on the basis of students specific programming background and skills atomic assignments which can be used to give students the experience they need to successfully complete the main assignments and some common pitfalls and gotchas to manage in the classroom The book s chief goals are to introduce novice computer science CS students to programming for DH and to offer them valuable hands on experience with core programming concepts **Professional Journal of the United States Army** , 2016-07 **Beyond Technonationalism** Kathryn C. Ibata-Arens, 2019-04-16 The biomedical industry which includes biopharmaceuticals genomics and stem cell therapies and medical devices is among the fastest growing worldwide While it has been an economic development target of many national governments Asia is currently on track to reach the epicenter of this growth What accounts for the rapid and sustained economic growth of biomedical in Asia To answer this question Kathryn Ibata Arens integrates global and national data with original fieldwork to present a conceptual framework that considers how national governments have managed key factors like innovative capacity government policy and firm level strategies Taking China India Japan and Singapore in turn she compares each country s underlying competitive advantages What emerges is an

argument that countries pursuing networked technonationalism NTN effectively upgrade their capacity for innovation and encourage entrepreneurial activity in targeted industries In contrast to countries that engage in classic technonationalism like Japan s developmental state approach networked technonationalists are global minded to outside markets while remaining nationalistic within the domestic economy By bringing together aggregate data at the global and national level with original fieldwork and drawing on rich cases Ibata Arens telegraphs implications for innovation policy and entrepreneurship strategy in Asia and beyond
