SBIR/STTR at the National Institutes of Health National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program--Phase II, 2016-01-28 The Small Business Innovation Research SBIR and Small Business Technology Transfer STTR programs provide federal research and development funding to small businesses In 2008 the National Research Council completed a comprehensive assessment of the SBIR and STTR programs The first round study found that the programs were sound in concept and effective in practice Building on the outcomes from the Phase I study this second phase examines both topics of general policy interest that emerged during the first phase and topics of specific interest to individual agencies and provides a second snapshot to measure the program's progress against its legislative goals

Convergence National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Key Challenge Areas for Convergence and Health, 2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships

Ghost industries Irene Curulli, 2018-08-03 What is the role of water in the conversion of former industrial areas How is water used in engaging the public to experience these sites both as physical and cultural places Can ecological design foster the coexistence of industry and environment The book addresses these core questions by examining the impact of the former Oregonian industry 1830 1940 on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry landscape and water This book is a source of suggestions and ideas for scholars students and professionals in architecture landscape architecture planning and their related fields who want to manage the urban landscapes successfully

Research, Quality, Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively

deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the cruel aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powers like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage

Implementing a Comprehensive Research Compliance Program Aurali Dade, Lori Olafson, Suzan M.

DiBella, 2015-07-01 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment These administrators are tasked with a special challenge ensuring that their institutions conduct safe ethical and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals These competing responsibilities can make the role of the research administrator complex however those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field Thus the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs Previous volumes on these topics have focused primarily on educating research faculty staff and students An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator yet the books have limited guidance intended for the senior research administrators themselves This handbook is designed therefore to serve as a detailed program implementation manual for these administrators who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research as well as upper administration and others interested in safe ethical and compliant research
