### **Current Perspectives and New Directions in Mechanics, Modelling and Design of Structural Systems**

Alphose Zingoni, 2022-09-02 Current Perspectives and New Directions in Mechanics Modelling and Design of Structural Systems comprises 330 papers that were presented at the Eighth International Conference on Structural Engineering Mechanics and Computation SEMC 2022 Cape Town South Africa 5-7 September 2022. The topics featured may be clustered into six broad categories that span the themes of mechanics modelling and engineering design: i) mechanics of materials (elasticity, plasticity, porous media, fracture, fatigue, damage, delamination, viscosity, creep, shrinkage, etc.); ii) mechanics of structures (dynamics, vibration, seismic response, soil-structure interaction, fluid-structure interaction, response to blast and impact, response to fire, structural stability, buckling, collapse, behaviour); iii) numerical modelling and experimental testing (numerical methods, simulation techniques, multi-scale modelling, computational modelling, laboratory testing, field testing, experimental measurements); iv) design in traditional engineering materials (steel, concrete, steel-concrete composite, aluminium, masonry, timber); v) innovative concepts (sustainable engineering and special structures, nanostructures, adaptive structures, smart structures, composite structures, glass structures, bio-inspired structures, shells, membranes, space structures, lightweight structures, etc.); vi) the engineering process and life cycle considerations (conceptualisation, planning, analysis, design, optimization, construction, assembly, manufacture, maintenance, monitoring, assessment, repair, strengthening, retrofitting, decommissioning). Two versions of the papers are available: full papers of length 6 pages are included in the e-book while short papers of length 2 pages intended to be concise but self-contained summaries of the full papers are in the printed book. This work will be of interest to civil, structural, mechanical, marine and aerospace engineers as well as planners and architects.

### **Proceeding of the 3rd International Conference on Electronics, Biomedical Engineering, and Health Informatics**

Triwiyanto, Achmad Rizal, Wahyu Caesarendra, 2023-04-28 This book presents high quality peer-reviewed papers from the International Conference on Electronics Biomedical Engineering and Health Informatics ICEBEHI 2022 held at Surabaya, Indonesia, virtually. The contents are broadly divided into three parts: a) Electronics, b) Biomedical Engineering, and c) Health Informatics. The major focus is on emerging technologies and their applications in the domain of biomedical engineering. It includes papers based on original theoretical, practical and experimental simulations, development, applications, measurements and testing. Featuring the latest advances in the field of biomedical engineering applications, this book serves as a definitive reference resource for researchers, professors and practitioners interested in exploring advanced

techniques in the fields of electronics biomedical engineering and health informatics The applications and solutions discussed here provide excellent reference material for future product development

Unraveling inflammaging : A pathway to Prevent Age-related Disease in Animals Toshiro Arai, Takahiro Teshima, Osamu Yamato, Jose Ceron, 2025-01-13 The field of age related diseases in animals particularly focusing on the concept of inflammaging forms the basis of this research topic Inflammaging a term coined to describe the chronic proinflammatory state often associated with aging has been linked to a variety of degenerative diseases This low grade chronic inflammatory state is believed to result from an accumulation of damaged macromolecules and cellular debris due to increased production and inhibited damage surveillance and repair functions in multiple tissues The secretion of proinflammatory cytokines from senescent cells known as the senescence associated secretory phenotype SASP is thought to contribute to the onset of inflammaging In animals such as dogs and cats the longer they live the more diseases they develop similar to humans with inflammaging being a potential cause of various age related diseases The primary aim of this research topic is to delve deeper into the mechanisms of inflammaging in animals and its role in age related diseases The goal is to develop new diagnostic biomarkers for inflammaging which could potentially lead to early diagnosis and prevention of age related diseases In an aging society the increase in age related diseases is inevitable However the extension of healthy life years and the ability to stay healthy until old age are standard medical requirements Therefore the early diagnosis of inflammaging could be a significant step towards preventing various age related diseases in animals

Best Practice Approaches for Mixed Methods Research in Psychological Science, volume II Gudberg K. Jonsson, Mariona Portell, M. Teresa Anguera, José Luis Losada, Judith Schoonenboom, 2025-10-27 Having started as a small movement in the 1980 s the study of mixed methods research burst onto the scene around the beginning of the second millennium After decades of intense dispute between supporters of the qualitative perspective and their quantitative counterparts with both sides having grown deeply entrenched in their respective views a complementary approach promising the possibility of integration had finally been proposed By that time however the vast majority of researchers had committed to one stance or the other very few of us argued that the two approaches could be complementary Since then the number of publications scientific meetings and other activities devoted to the mixed methods approach has increased exponentially throughout the world At a substantive level we are pleased to see that a growing number of fields are generating mixed methods research and we are eager to assist in promoting this trend But naturally the field has experienced some growing pains a certain degree of heterogeneity in terms of approaches differences of opinion regarding certain conceptualizations for example mixed methods vs multimethods numerous design taxonomies multiple ways of integrating qualitative and quantitative elements and various positions on how best to overcome the enduring lack of symmetry between qualitative and quantitative aspects The methodological and substantive spectrum is vast and broad possibly because the mixed methods approach has become obligatory for much research not only in psychology but in practically all branches of the social
