Stokey, 1990 A growth model is developed in which finite lived individuals invest in human capital and investments have a positive external effect on the human capital of later cohorts Heterogeneous labor is the only factor of production and higher quality labor produces higher quality goods Stationary growth paths along which human capital and the quality of consumption goods grow at a common constant rate are studied It is also shown that if a small economy is very advanced or very backward relative to the rest of the world then its rate of investment in human capital is lower under free trade than under autarky *Economic Growth* Gene M. Grossman, 1996 This new two volume set contains major recent theoretical and empirical contributions to the debate on long term economic growth Research on long term growth was revitalized in recent years as it became clear that countries were not converging in income levels as was

predicted by the neoclassical growth model. Also, differences in growth rates across countries seemed systematic and predictable. These findings led to the development of models of endogenous growth through which a country's long-run growth rate is determined by economic and policy variables. Professor Grossman, who is a recognized authority on the new growth theory, has chosen some of the most exciting and innovative papers on convergence and the endogenous growth models that were constructed to explain the stylized facts. Empirical tests of the new models are made accessible as well as extensions of the theory to study the effects of international trade on growth, the implications of imperfect capital markets for growth, and the relationship between the distribution of income and growth. **Informal Market Worlds** Peter

Mörtenböck, Helge Mooshammer, Teddy Cruz, 2015. The essays in the reader debate the scope of informality for generating economic, social, and political change. From discussing the conceptual challenges behind the development of a new political economy based on the philosophical, legal, and social architecture of other markets to exploring how changing global relations are already initiating new forms of urban practice, these analyses provide a thorough understanding of what is at stake in the new geography of Informal Market Worlds. With contributions by Teddy Cruz, Keith Hart, Jiang Jun, Lawrence Liang, MAP Office, Vyjayanthi Rao, Ananya Roy, Saskia Sassen, Abdou Malique Simone, Gayatri Chakravorty Spivak, Ignacio Valero, Matias Viegner, and others. The accompanying atlas brings together more than 80 case studies on the spatial and visual culture of informal markets from around the world. **Explorations in Economics** Alan Krueger, David A. Anderson, 2013-02-15

Bankruptcy, bubbles and bailouts Aeron Davis, 2022-10-18. The Treasury is one of Britain's oldest, most powerful, and secretive institutions, one that has played a central role in shaping the country's economic system. But all too often it has escaped public scrutiny when it comes to investigating the ups and downs of the UK economy. When portrayed, it is usually as a bedrock of government stability in times of crisis, repeatedly rescuing the nation's finances from the hands of posturing politicians and the combustions of world financial markets. However, there is another side to the story. In between the highs, there have been many lows, from botched privatizations to dubious private finance initiatives, from failing to spot the great financial crisis to facilitating ever-growing inequalities. Davis's book goes behind the scenes to offer an inside history of the Treasury in the words of the chancellors, advisors, and civil servants themselves. It shows the shortcomings as well as the successes, the personalities, and the thinking which have shaped Britain's economy since the mid-1970s. Based on interviews with over fifty key figures, it offers a fascinating alternative insight on how and why the UK economy came to function as it does today and why reform is long overdue. *Journal of Business Venturing*, 1993
