

The Challenges of Writing Patient Safety Narratives for Clinical Study Reports

-Thalla Sanjeeva

Introduction

There are many different challenges that a Medical writer may encounter while writing/ managing safety narratives for Clinical Study Reports. This paper describes the importance of safety narratives and emphasizes the related challenges and gives some ideas to help you in writing/ managing patient safety narratives. The Clinical Study Report is an integrated full report of an individual clinical study of any therapeutic, prophylactic or diagnostic agent conducted in human subjects. There should be a brief narrative describing each death, each serious adverse event, and any significant adverse events that are judged to be of special interest because of clinical importance. Patient safety narratives are vital components of Clinical Study Reports (CSRs) and Pharmacovigilance (e.g. Post Marketing safety reports).

What is the Role and Purpose of Patient safety narratives?

The Clinical Study Report is an integrated full report of an individual clinical study of any therapeutic, prophylactic or diagnostic agent conducted in human subjects. There should be a brief narrative describing each death, each serious adverse event, and any significant adverse events that are judged to be of special interest because of clinical importance. Patient safety narratives are vital components of Clinical Study Reports (CSRs) and Pharmacovigilance (e.g. Post Marketing safety reports). As per International Conference on Harmonization (ICH) E3 (Section 12.3.2/ 14.3.3) the Narrative should describe the following:

- The nature and intensity of the event
- The clinical course leading up to the event
- Timing relevant to study product administration
- Relevant Laboratory measurements
- Drug administration status
- Postmortem findings
- Investigator's opinion, etc.

In addition, the following information should be included:

- Subject Identifier
- Age and sex of the subject
- Clinical condition of the subject
- Disease being treated
- Relevant Medical history
- Concomitant and prior medication
